Executive Summary

In 2015 the Charter Township of Canton initiated the process of developing an Americans with Disabilities Act (ADA) Transition Plan. The Plan includes a comprehensive accessibility evaluation of its programs, services, activities and facilities, a budget and an action log.

The Charter Township of Canton staff considers this ADA Transition Plan as a step in the direction to provide an accessible community. For many years the Township staff has been removing barriers throughout the Township facilities by upgrading signage, sidewalks, parking lots, playgrounds, polling places and buildings. This effort is to ensure that citizens and guests with disabilities are provided access to the Township's facilities, services and programs.

The process started with hiring consultants to assess the barriers to Township structures and sites. Upon completion of the physical assessment, staff realized that an additional step was necessary. To perform a Self-Evaluation of barriers to programs, services and activities. A complete list of identified barriers and action steps is included in Sections 1 – 4. Included in the list is the recommended solution, estimated budget, and status of each item. It should be noted that the ADA Action Logs are working documents and items may be updated and modified as new information is realized.

- Section 4: Playground Assessment by A3C Collaborative Architecture

ADA Transition Plan History

Source: Accessology Self-Assessment

The Americans with Disabilities Act (ADA) is a civil rights law that mandates equal opportunity for individuals with disabilities. The ADA prohibits discrimination in access to jobs, public accommodations, government services, public transportation, and telecommunications. Title II of the ADA also requires that all Programs, Services, and Activities (PSAs) of public entities provide equal access for individuals with disabilities.

Title II has the broadest impact on the Township. Included in Title II are administrative requirements for all government entities employing more than 50 people. These administrative requirements are:

- Completion of a Self-Evaluation;
- Development of an ADA complaint procedure;
- Designation of at least one person who is responsible for overseeing Title II compliance; and
- Development of a Transition Plan to schedule the removal of the barriers uncovered by the Self-Evaluation process. The Transition Plan will become a working document until all barriers have been addressed.

As a requirement of Title II of the ADA, a transition plan will include:

- Identification of physical obstacles in the public entity's facilities that limit the accessibility of its programs or activities to individuals with disabilities
- Detailed descriptions of the methods used to make the facilities accessible
- Outlined steps to meet compliance, and if the time period of the transition plan is longer than one year, identify what will occur each year until compliance issues do not exist
- Identification of the public official responsible for the implementation of the Transition Plan
As a Title II entity, the Township intends to operate each program, service, or activity so that the program, service, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities. The Township is not necessarily required to make each of its existing facilities accessible to and usable by individuals with disabilities. The Township is not required to take any action that would threaten or destroy the historic significance of a historic property or take any action that would result in a fundamental alteration of the nature of a program, service, or activity or create any undue financial and administrative burden. The Township must, however, take any other action that would ensure that individuals with disabilities receive the benefits or services provided by the Township.

Public Outreach

The Township hosted a public workshop on August 3, 2017, to provide a summary of the Draft Self-Evaluation and receive feedback on the Transition Plan and Process. Citizens provided input regarding their concerns about the Plan and other accessibility challenges throughout the community. In addition, following the public meeting the Township administered a survey to solicit additional input from a wide range of community groups and residents. Feedback will continue to be sought prior to Plan adoption and throughout its implementation.

Action Logs

The Charter Township of Canton through the ADA Transition Plan is taking steps to identify and remedy barriers to access. The results of the plan are summarized in the ADA Action Logs, as referenced in Sections 1-4 of this plan. Updates on corrective actions made under the Transition Plan will continue to be identified in the Action Logs.

1. Self-Evaluation
2. Site Assessment
3. Building Assessment
4. Playground Assessment

At a minimum, the Action Logs will summarize action items that were identified by an independent contractor as no ADA compliant and will include anticipated completion dates. After the adoption of the Transition Plan by the Township Board, the ADA Action Logs will be updated annually by staff. The ADA Action Logs shall be available upon request.

Implementation Overview

Based on the items identified in the assessment of 38 sites, programs, services and activities, Canton staff have determined that it will take approximately five years to complete the Action Log items; provided Canton Township provides adequate funding. The project sites have been ranked based on:

- Property/Building Rental or Lease usage
- Public Visits
- Polling Location
- Employee Activity

Projects will be conducted in priority order based on the ranking, accommodation/modification requests made to the ADA Coordinator, and funding (General Funds, grants or alternative sources). Action Log items will also be executed in coordination with Capital Improvement Plan implementation.

It is understood that the management of the Action Log implementation will require an extensive amount of staff and consulting time. It may also result in the development of new policies, procedures and ordinances as needed.
Budget

The anticipated total budget to implement the ADA Transition Plan is included in the budget chart below. The amount is based on the projected costs provided by Spalding DeDecker and AC3 Collaborative Architects. Canton staff will continue to review the items identified by the consultants to determine which items can be corrected by Canton staff; which could significantly reduce the overall costs.

</tr>
</tbody>
</table>

Notes:

- Self-Evaluation Action Log items will be conducted mostly by Canton staff, but may require consulting fees.
- 30% Contingency added to sub-total for engineering, design, price fluctuation, and unforeseen construction costs.
- Sidewalks and intersections will be addressed as part of the annual Sidewalk/Gap Program conducted through Municipal Services.
- Cost for updates to the Emergency Operations Plan are not included in this estimate.

Next Steps

Canton’s ADA Transition Plan establishes a course of action for the Township to follow for many years to come. The Transition Plan identifies and prioritizes areas that need attention and also guides the Township in improving policies and practices to ensure that all residents, employees and participants of the community can enjoy the services and quality of life we pride ourselves in delivering.

An in-house team, with representatives from all Township departments will provide an additional resource to help ensure identified needs are being addressed efficiently and appropriately. Township website improvements further ensure that our information is readily available and requests for accommodations can be made easily and addressed in a timely manner. In addition, the Township will continue to seek input from a citizen’s task force to help focus on how we might continue to improve services and quality of life for residents, employees, participants and visitors of Canton Township.

With a written Transition Plan in hand and people who are dedicated and passionate about making progress, Canton staff looks forward to working together on behalf of the Township to ensure financial resources will be allocated and made available to address identified needs.

Should an individual need an accommodation, including but not limited to: mobility, parking, programming access, building access, auxiliary aids, translation services or documentation in an alternate format, they may make the request to the ADA Coordinator, call 734/394-5260, or online at www.canton-mi.org/122/accessibility.

1.0 Introduction

1.1 Legislative Mandate

The Americans with Disabilities Act (ADA) is a civil rights law that mandates equal opportunity for individuals with disabilities. The ADA prohibits discrimination in access to jobs, public accommodations, government services, public transportation, and telecommunications. Title II of the ADA also requires that all Programs, Services, and Activities (PSAs) of public entities provide equal access for individuals with disabilities.

The Charter Township of Canton has undertaken a comprehensive evaluation of its PSAs to determine the extent to which individuals with disabilities may be restricted in their access.

1.2 ADA Self-Evaluation and Transition Plan Development Requirements and Process

The Township is obligated to observe all requirements of Title I in its employment practices; Title II in its policies, programs, and services; any parts of Titles IV and V that apply to the Township and its programs, services, or facilities; and all requirements specified in the 2010 ADA Standards and 2011 Proposed Accessibility Guidelines for Pedestrian Facilities in the Public Right-of-Way (PROWAG) that apply to facilities and other physical holdings.

Title II has the broadest impact on the Township. Included in Title II are administrative requirements for all government entities employing more than 50 people. These administrative requirements are:

- Completion of a Self-Evaluation;
- Development of an ADA complaint procedure;
- Designation of at least one person who is responsible for overseeing Title II compliance; and
- Development of a Transition Plan to schedule the removal of the barriers uncovered by the Self-Evaluation process. The Transition Plan will become a working document until all barriers have been addressed.

This document describes the process developed to complete the evaluation of the Township’s PSAs and facilities, provides recommendations to remove programmatic barriers, and presents a Transition Plan for the modification of facilities and public rights-of-way to improve accessibility, which will guide the planning and implementation of necessary program and facility modifications over the next 25 years. The ADA Self-Evaluation and Transition Plan is significant in that it establishes the Township’s ongoing commitment to the development and maintenance of PSAs and facilities that accommodate all of its citizenry.

1.3 Discrimination and Accessibility

Program accessibility means that, when viewed in its entirety, each program is readily accessible to and usable by individuals with disabilities. Program accessibility is necessary not only for individuals with mobility needs, but also to individuals with sensory and cognitive disabilities.

Accessibility applies to all aspects of a program or service, including but not limited to physical access, advertisement, orientation, eligibility, participation, testing or evaluation, provision of auxiliary aids, transportation, policies, and communication.
The following are examples of elements that should be evaluated for barriers to accessibility:

### 1.3.1 Physical Barriers
- Parking
- Path of travel to, throughout, and between buildings and amenities
- Doors
- Service counters
- Restrooms
- Drinking fountains
- Public telephones
- Path of travel along sidewalk corridors within the public rights-of-way
- Access to pedestrian equipment at signalized intersections

### 1.3.2 Programmatic Barriers
- Building signage
- Customer communication and interaction
- Non-compliant sidewalks or curb ramps
- Emergency notifications, alarms, and visible signals
- Participation opportunities for Township sponsored events

### 1.4 Ongoing Accessibility Improvements

Township PSAs and facilities evaluated during the Self-Evaluation will continue to be evaluated on an ongoing basis, and the ADA Transition Plan should be revised to account for changes since the initial Self-Evaluation. Remaining phases will include prioritization and cost estimation of the facility evaluations previously conducted in 2014 and an approach will be put in place to remove all identified barriers. This Plan will be posted to the Township’s website for review and consideration by the general public. In addition, notice will be provided of the Plan’s existence in any official and unofficial Township publications.

### 1.5 Township Approach

The purpose of the Transition Plan is to provide the framework for achieving equal access to the Township’s programs, services, and activities within a reasonable timeframe. The Township’s elected officials and staff believe accommodating individuals with disabilities is essential to good customer service, the quality of life Township residents seek to enjoy, and to provide effective governance. This Plan has been prepared after careful study of all of the Township’s programs, services, and activities, and evaluation of previous facility evaluation reports.

The Township shall make reasonable modifications in PSAs when the modifications are necessary to avoid discrimination on the basis of disability, unless the Township can demonstrate that making the modifications would fundamentally alter the nature of the program, service, or activity. The Township will not place surcharges on individuals with disabilities to cover the cost involved in making PSAs accessible.
2.0 Public Outreach

The Township hosted a public workshop on August 3, 2017 at 6:30 PM to provide a summary of the Transition Plan and receive feedback on the Transition Planning process and any other concerns related to accessibility. In addition, following the public meeting the Township administered a survey to solicit additional input from a wide range of community groups and residents. As the Township moves forward with additional Self-Evaluation phases, the Township will continue to solicit feedback from the public on the Transition Plan.

The public input meeting transcript and list of attendees are provided in the Appendix.

3.0 Self-Evaluation and Summary of Findings

3.1 Programs, Policies and Procedures

The Township is in the process of improving the ADA/504 Coordinator system to better cover the needs of employees and citizens with disabilities. The Township’s ADA/504 Coordinator, will establish an ADA/504 Coordinator Liaison within each department who will work with the Township’s ADA/504 Coordinator regarding the needs of their department and the programs their department is responsible for managing. The Township’s ADA/504 Coordinator, or designee, will follow-up with departmental ADA Liaisons to coordinate the implementation of recommendations provided in this Transition Plan.

As a Title II entity, the Township must operate each program, service, or activity so that the program, service, or activity, when viewed in its entirety, is readily accessible to and usable by individuals with disabilities. The Township is not necessarily required to make each of its existing facilities accessible to and usable by individuals with disabilities. The Township is not required to take any action that would threaten or destroy the historic significance of a historic property or take any action that would result in a fundamental alteration of the nature of a program, service, or activity or create any undue financial and administrative burden. The Township must, however, take any other action that would ensure that individuals with disabilities receive the benefits or services provided by the Town. In those situations, where a program, service, or activity creates a barrier to accessibility that is unique to a department or a certain program, the ADA/504 Coordinator, or designee, will coordinate with the department director to address the removal of the barrier in the most reasonable and accommodating manner.

The determination that removal of a barrier would result in an undue burden must be based on an evaluation of all resources available for use. If a barrier removal action is judged unduly burdensome, the Township must consider other options for providing access that would ensure that individuals with disabilities receive the benefits and services of the program or activity.

The Township may achieve program accessibility by a number of methods:

- Structural methods such as altering an existing facility;
- Acquisition or redesign of equipment;
- Assignment of aides; and
- Providing services at alternate accessible sites.
When choosing a method of providing program access, the Township should endeavor to give priority to the one that results in the most integrated setting appropriate to encourage interaction among all users, including individuals with disabilities. In compliance with the requirements of the ADA, the Township provides equality of opportunity but does not guarantee equality of results.

### 3.1.1 Departmental Interviews

The Self-Evaluation of the Town’s programs, services, and activities required and involved the participation of every Township department. The Consultant conducted research of the Township’s website and documents submitted to the Consultant by the Township. After review of this information, the Consultant conducted interviews of specific departments.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

The departmental interviews were conducted to acquire basic information on how a person with a disability would participate in each program, service, or activity offered by each department. The interview notes can be found in the Appendix. The interviews included a review of the following information:

- Program or service description for each program/service offered by each department.
- Characterization of program or service participants, along with a description of any participation requirements, and any adaptations made to assist persons with disabilities.
- List of facilities where each program or service takes place.
- Information about the training provided or available to those administering the programs.
- Information regarding transportation procedures and methods used to accommodate persons with disabilities.
- Information regarding communication procedures for audio/visual presentations, telephone communication, participant notifications, and documents/publications, including any modifications or equipment used to accommodate people with disabilities.
- Information regarding emergency 9-1-1 services for people with sensory impairments.
- Description of emergency evacuation procedures designed to accommodate people with disabilities.
- Information regarding automated electronic equipment used in a program or service accessible to all participants.
- Methods used to ensure that all public meetings relating to a program or service are designed to accommodate persons with disabilities.

**Self-Evaluation Findings:**

Most department contacts were aware of the Township specific ADA obligations.

Most department contacts were aware of the Township’s grievance procedure.
Most department contacts were aware that alternative formats can be requested, but it is was not clear to who those requests are sent and how they are processed. The Township does maintain a resource list of providers of various accessibility aides.

No department was found to have separate programs, services, or activities for persons with disabilities.

Most department contacts consider their department's programs, services, and activities to be accessible and in compliance with the ADA.

Possible Solutions:

The Consultant recommends that an ADA Liaison be assigned to each department. This liaison will coordinate with the ADA/504 Coordinator on all issues related to their specific department's activities.

3.1.2 ADA/504 Coordinator (Title I / Title II)

The Americans with Disabilities Act of 1990 (ADA) Title I prohibit private employers, state and local governments, employment agencies and labor unions from discriminating against qualified individuals with disabilities in job application procedures, hiring, firing, advancement, compensation, job training, and other terms, conditions, and privileges of employment. The ADA Title I cover employers with 15 or more employees based on an entity wide employee total count, including state and local governments.

Under the ADA Title II, when a public entity has 50 or more employees based on an entity wide employee total count, it is required to designate at least one qualified responsible employee to coordinate compliance with ADA requirements. The name, office address and telephone number of this individual must be available and advertised to employees and the public, as this makes it easy to identify someone to assists with questions and concerns regarding disability discrimination.

Below is a list of qualifications that are recommended by U.S. Department of Justice:

- Familiarity with the entity’s structures, activities, and employees;
- Knowledge of the ADA and other laws addressing the rights of people with disabilities, such as Section 504 of the Rehabilitation Act;
- Experience with people with a broad range of disabilities;
- Knowledge of various alternative formats and alternative technologies that enable people with disabilities to communicate, participate, and perform tasks;
- Ability to work cooperatively with local entities and people with disabilities;
- Familiarity with any local disability advocacy groups or other disability groups;
- Skills and training in negotiation and mediation; and
- Organizational and analytical skills.

Self-Evaluation Findings:

After a thorough review of the Township's website and Township provided documents, it was found that the Township had appointed an ADA/504 Coordinator for Title II. Below is the appointed designee's contact information:

Kerreen Conley, Human Resources Manager
1150 S. Canton Center Rd.
Canton, MI 48188
Phone: (734) 394-5260
Kerreen.Conley@canton-mi.org
Potential Solutions:

The Consultant Team recommends that the designee’s contact information be publicized in common areas that are accessible to all employees and areas open to the public. Also, this information must be included in all information regarding Title II that is disseminated from the Township. This includes continuing to posting this information on the website.

3.1.3 Roles and Responsibilities of the ADA/504 Coordinator

Title I of the Americans with Disabilities Act of 1990 (ADA) prohibits private employers, state and local governments, employment agencies and labor unions from discriminating against qualified individuals with disabilities in job application procedures, hiring, firing, advancement, compensation, job training, and other terms, conditions, and privileges of employment. The ADA covers employers with 15 or more employees based on an entity wide employee total count, including State and local governments.

Under the ADA Title II, when a public entity has 50 or more employees based on an entity wide employee total count, it is required to designate at least one qualified responsible employee to coordinate compliance with ADA requirements.

Self-Evaluation Findings:

After a thorough review of the Township’s website and Township provided documents, no information regarding the roles and responsibilities of the ADA/504 Coordinator was found.

Possible Solutions:

The Consultant Team recommends the township expand the information on the website to include a description of the roles and responsibilities of the ADA/504 Coordinator as outlined under Title II. See the Appendix for a copy of the Roles and Responsibilities of the ADA/504 Coordinator guidelines.

3.1.4 ADA Grievance Procedure and Grievance Form with Appeal Process (Title I)

Title I of the Americans with Disabilities Act of 1990 (ADA) prohibits private employers, state and local governments, employment agencies, and labor unions from discriminating against qualified individuals with disabilities in job application procedures, hiring, firing, advancement, compensation, job training, and other terms, conditions, and privileges of employment. The ADA covers employers with 15 or more employees based on an entity wide employee total count, including State and local governments.

The purpose of the ADA grievance procedure is to provide a mechanism for the resolution of discrimination issues at the Township level, rather than require the complainant resorting to resolution at the federal level.

Self-Evaluation Findings:

After a thorough search and review of the Township’s website and Township provided documents, an ADA grievance procedure and grievance form with appeal process was found but it was noted to be a draft document. The existing grievance procedure included all of the necessary information as well as the appeal process. As requested, the Consultant has developed a model grievance procedure with appeal process and grievance form.
**Potential Solutions:**

The Consultant Team recommends the developed ADA Grievance Procedure and Grievance Form with Appeal Process for Title I be adopted, posted on the web and publicized in common areas that are accessible to all employees and areas open to the public. See the **Appendix** for a copy of the grievance procedure and form.

It is further recommended that the Township maintain an ADA complaint log. This log shall include an internal complaint number, details about the complaint, and details regarding the resolution.

### 3.1.5 ADA Grievance Procedure and Grievance Form with Appeal Process (Title II)

Local governments with 50 or more employees are required to adopt and publish procedures for resolving grievances in a prompt and fair manner that may arise under Title II of the ADA.

The purpose of the ADA grievance procedure is to provide a mechanism for the resolution of discrimination issues at the Township level, rather than require the complainant resorting to resolution at the federal level.

**Self-Evaluation Findings:**

After a thorough review of the Township’s website and Township provided documents, an ADA grievance procedure and grievance form with appeal process was found but it was noted to be a draft document. The existing grievance procedure included all of the necessary information as well as the appeal process. As requested, the Consultant has developed a model grievance procedure with appeal process and grievance.

**Potential Solutions:**

The Consultant Team recommends the developed ADA Grievance Procedure and Grievance Form with Appeal Process for Title II be posted on the web and publicized in common areas that are accessible to all employees and areas open to the public. See the **Appendix** for a copy of the grievance procedure and form.

It is further recommended that the Township maintain an ADA complaint log. This log shall include an internal complaint number, details about the complaint, and details regarding the resolution.

### 3.1.6 Reasonable Accommodation Request Policy and Procedure and Request Form

The reasonable accommodation request process plays a very important role when ensuring that the Township does not discriminate based on a disability. A reasonable accommodation is any modification to a job, the work environment, or the way things are usually done that allows an individual with a disability to apply for a job, perform job functions, or enjoy equal access to benefits available to other individuals in the workplace.

**Self-Evaluation Findings:**

After a thorough review of the Township’s website and Township provided documents, no reasonable accommodation request policy, procedure, or request form was found.
Potential Solutions:

The Consultant Team recommends the Township develop a reasonable accommodation request policy and procedure and request form. This request policy and procedure shall be adopted Township-wide and shall be accessible to all employees and to the public. The Consultant has provided a model reasonable accommodation request process and request form. See Appendix.

It is further recommended that the Township maintain a reasonable accommodation request log. This log shall include an internal request number, details about the request, and details regarding the resolution.

3.1.7 Service Animal Guidance for Reasonable Accommodations

A reasonable accommodation is any modification or adjustment to a job or the work environment that enables a qualified applicant or employee with a disability to participate in the application process or perform essential job functions. A reasonable accommodation may also include the use of a service animal. Service animals are utilized for a variety of reasons, so each accommodations request and modification may be different.

Self-Evaluation Findings:

The Township provided a policy from Canton Leisure Services (CLS) in regards to Therapy/Service Animals. The policy states “the policy addresses allowing people with disabilities to bring their service animals into CLS facilities.” However, the policy only includes language regarding allowance of service animals into privately owned businesses. No policy specific to service animals within Township property was located.

Potential Solutions:

The Consultant Team recommends the Township develop guidance for staff to reference when dealing with service animals as reasonable accommodations in Township facilities.

3.1.8 Reasonable Modification Request Policy and Procedure and Request Form

The reasonable modification request process plays a very important role when ensuring that the Township does not discriminate based on a disability. This process allows for an opportunity for an individual to request an accommodation that would provide equal access to any Township program, service, and activity. A public entity must reasonably modify its policies, practices, or procedures to avoid discrimination, unless the modification would fundamentally alter the nature of its program, services, or activity.

Self-Evaluation Findings:

After a thorough review of the Township’s website and Township provided documents, a “Request for Inclusion and Accommodations” form was found within the Therapeutic Recreation section of the Canton Leisure Services area of the website. This form is specific to Leisure Services and the recreation programs offered by the Township.

Potential Solutions:

The Consultant Team recommends the Township develop a reasonable modification request policy and procedure to accompany the request form. This request policy and procedure should be adopted Township-wide and shall be accessible to all employees and to the public. The Consultant has provided a model reasonable modification request procedure and request form. See Appendix.
It is further recommended that the Township maintain a reasonable modification request log. This log shall include an internal request number, details about the request, and details regarding the resolution.

3.1.9 Service Animal Guidance for Reasonable Modifications in Public Places
A reasonable accommodation is any modification or adjustment to a provided program, service, and/or activity that the entity provides to ensure accessibility. A reasonable accommodation may also include the use of a service animal. Service animals are utilized for a variety of reasons, so each accommodations request and modification may be different.

**Self-Evaluation Findings:**

The Township provided a policy from Canton Leisure Services (CLS) in regards to Therapy/Service Animals. The policy states “the policy addresses allowing people with disabilities to bring their service animals into CLS facilities.” However, the policy only includes language regarding allowance of service animals into privately owned businesses. No policy specific to service animals within Township property was located.

**Potential Solutions:**

The Consultant Team recommends the Township develop guidance for staff to reference when dealing with service animals as reasonable accommodations.

3.1.10 ADA Grievance Procedure and Grievance Form with Appeals Process for Section 508 of the Rehabilitation Act

Section 508 of the Rehabilitation Act of 1973 requires that all electronic and information technologies developed and used by any Federal government agency must be accessible to individuals with disabilities. This includes websites, video and audio tapes, electronic books, televised programs, and other such media. Individuals with disabilities may still have to use special hardware and/or software to access the resources. This law pertains to federal government. However, each state can adopt these regulations for state use.

**Self-Evaluation Findings:**

After a thorough review of the Township’s website and Township provided documents, the “Website Accessibility” area of the website mentions that “We work to comply with Section 508...” and provides a hyperlink to a Township contact list and does not provide contact information to a specific department or person.

**Potential Solutions:**

The Consultant Team recommends the Township develop an ADA grievance procedure and grievance form with appeals process for Section 508 of the Rehabilitation Act. This policy and procedure shall be adopted Township-wide, posted on the web and publicized in common areas that are accessible to all employees and areas open to the public.

It is further recommended that the Township maintain an ADA complaint log. This log shall include an internal complaint number, details about the complaint, and details regarding the resolution.
3.1.11 Retaliation or Coercion Policy

Individuals who exercise their rights under the ADA, or assist others in exercising their rights, are protected from retaliation. The prohibition against retaliation or coercion applies broadly to any individual or entity that seeks to prevent an individual from exercising their rights or to retaliate against individuals for having exercised their rights.

Self-Evaluation Findings:

After a thorough search and review of the Township’s website and Township provided documents, a Retaliation Policy was not found.

Potential Solutions:

The Consultant Team recommends the Township develop and incorporate a retaliation and coercion policy into. This policy shall be adopted Township-wide and shall be accessible to all employees and to the public.

3.1.12 Non-Discrimination Statement Policy

All public entities must ensure that no qualified individuals with disabilities shall be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under any program, service, or activity administered by that entity.

In doing so, public entities must provide a statement in any publication or document disseminated to employees or to the public that provides this information. The statement must also provide contact information for the ADA/504 Coordinator.

Self-Evaluation Findings:

After a thorough review of the Township’s website and Township provided documents, the Township’s non-discrimination statement was located.

Potential Solutions:

The Consultant Team recommends the Township revise any existing non-discrimination statement to be used consistently Township-wide. This statement shall be accessible to all employees and be utilized for departmental documents, forms, etc.

3.1.13 Non-Discrimination Clause Policy

All public entities must ensure that no qualified individual with disabilities be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under any program, service, or activity administered by that entity.

In doing so, an ADA non-discrimination clause shall be applied to any and all Township sub-recipients, if applicable. Thus, the assurance must be applied to all “funding agreements” that the Township employs to pass federal funds to other agencies, entities, or municipalities. This would include any contract with federal funding and all joint use agreements.
Self-Evaluation Findings:

After a thorough review of the Township’s website and the Township provided documents, no ADA non-discrimination clause policy was found.

Potential Solutions:

The Consultant Team recommends the Township develop Township-wide non-discrimination clause policy. This policy shall be accessible to applicable departments to utilize for all “funding agreements” that the Township employs to pass federal funds to other agencies, entities, or municipalities but not contractors. This would include any contract with federal funding and all joint use agreements.

3.1.14 Public Notice under the Americans with Disabilities Act

The ADA Public Notice requirement applies to all state and local government covered by Title II, even entities with fewer than 50 employees. The target audience for the public notice includes applicants, beneficiaries, and other people interested in the entity’s programs, services, and/or activities. This notice is required to include information regarding Title II of the ADA and how it applies to the programs, services, and activities of the public entity. Publishing and publicizing the ADA notices is not a one-time requirement. State and local government entities should provide the information on an ongoing basis, whenever necessary.

Self-Evaluation Findings:

After a thorough review of the Township’s website and Township provided documents, the Township appears to have a public notice statement located under the Access to Public Meeting section of the Board of Trustees area of the website. The notice appears to include all of the language suggested by the US Department of Justice.

Potential Solutions:

The Consultant Team recommends the Township relocate the public notice to a more prominent and accessible location on the website.

3.1.15 ADA Assurances

As a Federal recipient, the Township is required to provide written assurance, as well as acquire assurances from sub-recipients. This assurance states that as a federal recipient of programs, services and activities will be conducted in compliance with all requirements.

Per 49 CFR Part 27.9, “Each application for Federal financial assistance to which this part applies, and each application to provide a facility, shall, as a condition to approval or extension of any Federal financial assistance pursuant to the application, contain, or be accompanied by, written assurance that the program or activity will be conducted or the facility operated in compliance with all the requirements imposed by or pursuant to this part. An applicant may incorporate these assurances by reference in subsequent applications to the Department.”

Self-Evaluation Findings:

After a thorough review of the Township’s website and Township provided documents, no ADA assurances were found.
Potential Solutions:

The Consultant Team recommends the Township develop an ADA assurance in accordance with the Code of Federal Regulations. Please consult your ADA Liaison through the Federal Highway Administration. Attached are numerous items required for the grant programs. The Township has an anti-discrimination policy for CDBG which has been updated to include disabilities in that policy.

Township policies are in compliance with federal grants. Additionally, the Town purchasing policy on the Source has a specific section that says we will not discriminate, which includes disability in that language.

3.1.16 Alternate Format Policy and Procedure and Request Form

Under the ADA, a public entity is responsible for providing ADA accessible communications. This would include any documents or information that is disseminated from an entity. In the event that a request for an alternate format is received, the Township must have an action plan in place. The Department of Justice does not expect entities to have Braille copies of documents on hand at all times. However, they do expect them to be readily available. Readily available means that once a request is received, a policy and procedure is in place to make a reasonable accommodation or modification to the document or information requested. This document must be provided to the requestor in a reasonable amount of time.

Self-Evaluation Findings:

After a thorough review of the Township's website and Township provided documents, no alternate format policy and procedure and request form was found.

Potential Solutions:

The Consultant Team recommends the Township develop an alternate format policy and procedure and request form. This policy and procedure shall be adopted Township-wide and shall be accessible to all employees and to the public.

3.1.17 Boards, Commissions and Committees

Many Township departments are responsible for holding public meetings. Examples of public meetings include open houses for public projects, Board of Trustees meetings, and the following list of Boards, Commissions, and Committees:

<table>
<thead>
<tr>
<th>Boards, Commissions, and Committees</th>
</tr>
</thead>
<tbody>
<tr>
<td>Board of Trustees</td>
</tr>
<tr>
<td>Board of Election Commissioners</td>
</tr>
<tr>
<td>Building Board of Appeals</td>
</tr>
<tr>
<td>Commission for Culture, Arts, and Heritage</td>
</tr>
<tr>
<td>Historic District Commission</td>
</tr>
<tr>
<td>Leisure Services Advisory Committee</td>
</tr>
<tr>
<td>Neighborhood Know-How Committee</td>
</tr>
<tr>
<td>Tax Board of Review</td>
</tr>
<tr>
<td>Art Exhibition Committee</td>
</tr>
<tr>
<td>MLK Day Sub-Committee</td>
</tr>
<tr>
<td>Partnership for the Arts &amp; Humanities</td>
</tr>
<tr>
<td>Block Grant Advisory Council</td>
</tr>
<tr>
<td>Building Authority</td>
</tr>
<tr>
<td>Canton Historical Society</td>
</tr>
<tr>
<td>Downtown Development Authority Board</td>
</tr>
<tr>
<td>Planning Commission</td>
</tr>
<tr>
<td>Merit Commission</td>
</tr>
<tr>
<td>Senior Advisory Council</td>
</tr>
<tr>
<td>Zoning Board of Appeals</td>
</tr>
<tr>
<td>Asian Pacific Program</td>
</tr>
<tr>
<td>Multicultural Committee</td>
</tr>
</tbody>
</table>
The Boards, Commissions, and Committees were reviewed to determine how a person with a disability would be able to participate on each board, ensure board meetings are held in accessible location, and determine the process for getting on a board to ensure people with disabilities have an equal opportunity to participate in civic life.

Self-Evaluation Findings:

Eligibility requirements for all boards, commissions, and committees were evaluated and no issues were found. All meeting agendas that were evaluated included instructions on how to request accommodations. Some meeting agendas did provide a timeframe to request meeting accommodations and that timeframe varied from 2 weeks to 48 hours. Other meeting agendas did not include any timeframe in which to submit a meeting accommodation request.

Possible Solutions:

It is recommended that all meeting agendas provide a timeframe for submittal of meeting accommodation requests and that timeframe be consistent among the boards, commissions, and committees.

It is recommended that all boards, commissions, and committees attend annual ADA training, along with Township staff. It is recommended that all meeting Agendas and Minutes include a Township-wide non-discrimination statement that is posted on the web and publicized in common areas that are accessible to all employees and areas open to the public.

3.1.18 Printed Information

Under the ADA, a public entity is responsible for providing ADA accessible communications. This would include any documents or information that is disseminated from an entity. In the event that a request for an alternate format is received, the Township must have an action plan in place. The Department of Justice does not expect entities to have Braille copies of documents on hand at all times. However, they do expect them to be readily available. Readily available means that once a request is received, a policy and procedure is in place to make a reasonable accommodation or modification to the document or information requested. This document must be provided to the requestor in a reasonable amount of time.

Self-Evaluation Findings:

After a thorough review of the Township’s website and Township provided documents, no alternate format policy and procedure and request form was found. Isn’t this in 3.1.17? Is there any reason the policy and the form to accommodate the policy cannot be addressed in the same section?

Possible Solutions:

The Consultant Team recommends the Township develop an alternate format policy and procedure and request form. This policy and procedure shall be adopted Township-wide and shall be accessible to all employees and to the public.
3.1.19 Documents, Forms and Videos

The Township website provides various documents, forms, and videos that are available to the public. For a complete listing of documents, forms, and videos reviewed, see the Appendix.

Self-Evaluation Findings:

The Township does not have alternate formats on hand for every document, form, or video.

The Township does not have a policy on obtaining alternate formats.

The Township does not have a policy on placing responsibility and/or acceptance for ADA Compliance regarding another entity's links, documents, forms, videos, etc. that is represented on the Township’s website.

The Township does not have a defined policy and procedure on closed captioning.

The Township does not have a consistent Township-wide non-discrimination statement that is used in documents, forms, videos, etc. that are disseminated by the Township.

Potential Solutions:

It is recommended each department develop a list of all documents and forms used by or needed for the general public for each department. This list shall contain the document or form name, locations of where it can be found (office location, website link, etc.), what type of alternate formats are available, and where/how these formats can be obtained. This list must be updated continuously as documents and forms are created and revised.

It is recommended the Township develop an alternate format policy and procedure and request form. This policy and procedure shall be adopted consistently Township-wide and shall be accessible to all employees and to the public.

It is recommended the Township develop a disclaimer statement to express responsibility and/or acceptance for ADA compliance regarding another content entity's site, links, forms, documents, videos, etc. that are represented on Township's website. This statement shall be posted on the web and publicized in common areas that are accessible to all employees and areas open to the public.

It is recommended the Township develop guidelines to assist staff in providing closed captioning for videos that are available to all employees and the public.

It is recommended the Township use the adopted Township-wide non-discrimination statements for Title I and Title II of the ADA. This statement shall ensure individuals that the Township does not discriminate based on a disability, and must also provide information on how to obtain a reasonable accommodation or modification.

It is further recommended the Township develop internal policies and procedures, which shall provide specific instructions on incorporating specific statements in all documents, forms, information, etc. that is disseminated by the Township.
3.1.20 Links to Other Web Sites

The Township website provides various links to other websites that are available to the public.

Self-Evaluation Findings:

The Township does not have a policy on placing responsibility and/or acceptance for ADA compliance regarding another entity's link / form / document / video that is represented on the Township's website.

Potential Solutions:

The Consultant Team recommends that the Township develop a disclaimer statement to express responsibility and/or acceptance for ADA compliance regarding another content entity's site, links, forms, documents, videos, etc. that are represented on Township's website. This statement shall be posted on the web and publicized in common areas that are accessible to all employees and areas open to the public.

3.1.21 Databases, Directories, Online Purchases, Online Payments, Sign Ups, Registrations, File Reports, etc.

The website provides various databases, directories, online purchases, online payments, sign ups, registrations, file reports, view and submit bids, etc. that are available to the public.

Self-Evaluation Findings:

Databases are not available in alternate formats and the Township does not have a current policy on obtaining alternate formats.
Directories are not available in alternate formats and the Township does not have a current policy on obtaining alternate formats.
Search Databases are not available in alternate formats and the Township does not have a current policy on obtaining alternate formats.
Customers can make purchases and payments on the web, in person and via mail.
Customers can sign up for services on the website, in person, via mail, via fax, and via email.
Customers can register for services on the website, in person, via email, via fax, and via email.
Customers can file reports on the website in person, via mail, via fax, and via email.

Potential Solutions:

The Consultant Team recommends the Township develop an alternate format policy and procedure and request form. This was already mentioned above. This policy and procedure shall be Township-wide and shall be accessible to all employees and to the public.
3.1.22 Acceptance Policy for Links, Forms, Documents and Videos by other Entities

Under the ADA, a public entity is responsible for providing ADA accessible communications. This would include any documents or information that is disseminated from an entity. In the event that a request for an alternate format is received, the Township must have an action plan in place. The Department of Justice does not expect entities have braille copies of documents laying around. However, they do expect them to be readily available. Readily available means that once a request is received, a policy and procedure is in place to make a reasonable accommodation or modification to the document or information requested. This document must be provided to the requestor in a reasonable amount of time.

Self-Evaluation Findings:

After a thorough review of the Township's website and Township provided documents, no policy regarding accepting responsibility for other entities links, forms, documents and videos was found.

Potential Solutions:

It is recommended the Township develop a disclaimer statement to express responsibility and/or acceptance for ADA compliance regarding content on another entity's site, links, forms, documents, videos, etc. that are represented on the Township's website. This statement shall be posted on the web and publicized in common areas that are accessible to all employees and areas open to the public.

3.1.23 Programs

Several community special programs under the Fire Department, Police Department, and Leisure Services were reviewed. Programs offered by the Fire Department and Police Department were reviewed to determine the eligibility requirements for participation, determine how a citizen with a disability would participate, and if alternative measures could be taken if any area of the program cannot be made accessible.

The Parks and Recreation Department has many different programs for citizens. A master "Standard Operating Procedures" (SOP) should be developed to identify how each program can handle participants with varying disabilities. A current SOP will identify potential problems with each program from registration through participation. It is important to ensure participants with disabilities have full participation in events hosted on land owned by the Township, by placing the responsibility for accessibility on the vendor or group leasing the property from the Town.

Self-Evaluation Findings:

The Fire Department hosts a Youth Academy that is a joint venture with the Police Department. No physical requirements were noted for participation. This program is held at the Administration Building and Fire Station No. 1.

The Police Department hosts a Citizens’ Police Academy. No physical requirements were noted for participation.

“Coffee with a Cop” is a community interaction program that is typically hosted at a private business (coffee shop etc.). As the Township is providing this activity, it must ensure that it is accessible to persons with disabilities. Since the activity is hosted at a private establishment, the Township must ensure that the facility is accessible.

Possible Solutions:

The Consultant recommends that the Township, in the administration of the “Coffee with a Cop” program, must ensure that the facility chosen for the Coffee with a Cop is accessible to all participants.
3.1.24 Emergency Management Plan

The Township’s Emergency Center Operations Plan was reviewed to determine who handles citizens with disabilities, the training received by these individuals, how medications are stored, how service animals are handled, and any other relevant items. Emergency management procedures often have only a brief mention of handling people with special needs; however, details need to be provided on how people will disabilities will be accommodated.

Self-Evaluation Findings:

The Emergency Center Operations Plan is not an emergency management plan. This plan provided key contacts as well as locations of local hospitals, pharmacies, and specialty housing. The plan does not address any elements regarding people with disabilities. The Township advised that a new emergency management plan was in the process of being developed.

Possible Solutions:

The Consultant recommends the newly developed emergency management plan be evaluated when it becomes available.

3.2 Facilities Review

In 2014, the Township contracted with AC3, an architectural firm, who conducted a comprehensive evaluation of the interiors of twenty-nine (29) Township owned facilities. The evaluations will provide the Township an overview of the architectural barriers that prevent people with disabilities from using its facilities and participating in its programs. Detailed measurements of the existing conditions were recorded during the evaluation process and were included in the facility reports. This additional information assisted the Consultant Team and Township staff in prioritizing barriers for removal.

Summary reports were developed for each facility type to document the findings of the evaluations. The reports identify the compliance status of each facility with regard to federal standards and include the following elements:

- Listing of facilities that are in compliance with current ADA standards;
- Listing of facilities that are not in compliance with current ADA requirements;

The Township provided a document titled “ADA Compliance” which included a list of 38 facilities that were assigned an ADA priority level based on the level of rental or lease activity, number of public visits, whether it was a polling location and the level of employee activity. The Consultant Team agrees with this methodology and recommends that this ranking system be applied to any remaining Canton facilities not listed in this document. However, there may be high priority items in facilities that received a lower overall ranking due to its amount of rental activity, polling activity or public and employee use. Many facilities are shown to have been constructed since January 26, 1992 and have barriers. These facilities, regardless of type, would be a higher priority as all construction completed since January 26, 1992 was required to be in full compliance with the ADA standards.

Copies of the facility evaluation reports, Transition Plan Summary, Canton ADA Compliance, and ADA Compliance documents are provided in the Appendix.
3.2.1 Buildings

Nineteen (19) buildings within the Township were evaluated by AC3 as part of the 2014 evaluation process. Items evaluated building entrances, entrances, interior routes including doors and hallways, public areas, employee areas, break rooms, restrooms, drinking fountains and public telephones.

<table>

<tr>
<td>Western Wayne Narcotics Building</td>
</tr>
</tbody>
</table>

Self-Evaluation Findings:

The Transition Plan Summary document provided by the Township states that “Barriers under each facility element are characterized as Priority 1, 2 and 3 and are identified in the Remarks column of each checklist in the Assessment.” The Consultant team reviewed the 2014 facility evaluation reports and have determined that the reports do not have a “Remarks” column but do include a “Priority” column. The “Priority” columns are complete on all facility evaluation reports. The Transition Plan Summary further states that each non-compliant element was then identified by the level of effort (M—maintenance, C—contractor, DB—design/bid/build, and A—administrative) required to remove the barriers. No such identification of the level of effort was found.

A document titled “Canton ADA Site Evaluation” was provided to the Consultant Team and includes exterior site evaluations for 34 facilities. The evaluations are noted to have been completed in June 2009. As with the facility interior checklists, the identified barriers were later prioritized according to the facility use, traffic, and severity of non-compliance. No facility photographs were provided for the Consultant Team to review, only the facility checklists previously completed. Each had links to photographs, but the links were not operable so the facility checklist data was used for the development of the remediation plan.

Each facility has a Budget sheet with estimated dollar amounts for remediation. The Consultant Team generally recommends a Title II entity to plan 10% additional for engineering or design fees and 15% for general contingency. The budget sheets had an additional 10% provided. The Consultant Team prepared a document called “Summary of Costs for Facilities” and added a column providing the additional 15% contingency for planning purposes.

A document titled “Canton Prioritization Chart Americans with Disabilities Act” was provided to the Consultant team and indicates the priority of each facility based on a number of factors including public use, rental use, voter use, etc. The Consultant Team has reviewed the priority and methodology and agrees with the Township on the priority established.

Possible Solutions:

The Consultant Team recommends the Township to use the data gathered as a living document to avoid having to recollect data every four to five years as recommended by the Department of Justice. With the data digitalized and
used as part of the annual planning, no recollection should be necessary except for verification purposes. The Consultant team further recommends the process is fluid enough to allow changes based on requests from citizens or changing conditions. A low priority item could become a high priority item over time. This also indicates the need for ensuring the maintenance team is properly trained to catch level changes as they occur and keep foliage from growing over or into an accessible route.

The Consultant Team recommends that the deficiencies identified in the 2014 facility evaluation reports be placed into the overall remediation plan and monitored on a regular basis.

3.2.2 Parks

Ten (10) parks within the Township were evaluated by AC3 as part of 2009 evaluation process. The evaluations cataloged non-compliance regarding park amenities (concessions, restrooms, etc.).

<table>
<thead>
<tr>
<th>Parks</th>
<th></th>
</tr>

<tr>
<td>Freedom Park</td>
<td>Pleasant Run Golf Course</td>
</tr>
<tr>
<td>Griffin Park</td>
<td>Victory Park</td>
</tr>
</tbody>
</table>

Self-Evaluation Findings:

The Transition Plan Summary document provided by the Township states that “Barriers under each facility element are characterized as Priority 1, 2, and 3 and are identified in the Remarks column of each checklist in the Assessment.” The Consultant team reviewed the 2014 facility evaluation reports and have determined that the reports do not have a “Remarks” column but do include a “Priority” column. The “Priority” columns are blank on all facility evaluation reports. The Transition Plan Summary further states that each non-compliant element was then identified by the level of effort (M- maintenance, C – contractor, DB – design/bid/build, and A – administrative) required to remove the barriers. No such identification of the level of effort was found.

A document titled “Canton ADA Site Evaluation” was provided to the Consultant Team and includes exterior site evaluations for 34 facilities. The evaluations are noted to have been completed in June 2009. Barriers have since been prioritized and budgets were prepared for remediation.

Possible Solutions:

The Consultant Team recommends that the deficiencies identified in the 2014 facility evaluation reports be placed into the overall remediation plan and monitored on a regular basis.
3.2.3 Signalized Intersections

No signalized intersections were evaluated as part of this phase of the Self-Evaluation.

Self-Evaluation Findings:
To be determined.

Possible Solutions:
To be determined.

3.2.4 Sidewalk Corridors

No sidewalk corridors were evaluated during this phase of the Self-Evaluation.

Self-Evaluation Findings:
To be determined.

Possible Solutions:
To be determined.

3.3 Maintenance Versus Alterations

The United States Department of Justice (DOJ) has issued a briefing memorandum on clarification of maintenance versus alteration projects. Information contained in the briefing memorandum is below. We recommend this clarification with regard to when curb ramp installation is required as part of a project be disseminated to the appropriate Township staff.

The Americans with Disabilities Act of 1990 (ADA) is a civil rights statute prohibiting discrimination against persons with disabilities in all aspects of life, including transportation, based on regulations promulgated by the United States Department of Justice (DOJ). DOJ’s regulations require accessible planning, design, and construction to integrate people with disabilities into mainstream society. Further, these laws require that public entities responsible for operating and maintaining the public rights-of-way do not discriminate in their programs and activities against persons with disabilities. FHWA’s ADA program implements the DOJ regulations through delegated authority to ensure that pedestrians with disabilities have the opportunity to use the transportation system’s pedestrian facilities in an accessible and safe manner.

FHWA and DOJ met in March 2012 and March 2013 to clarify guidance on the ADA’s requirements for constructing curb ramps on resurfacing projects. Projects deemed to be alterations must include curb ramps within the scope of the project.

This clarification provides a single Federal policy that identifies specific asphalt and concrete-pavement repair treatments that are considered to be alterations – requiring installation of curb ramps within the scope of the project – and those that are considered
to be maintenance, which do not require curb ramps at the time of the improvement. Figure 1 provides a summary of the types of projects that fall within maintenance versus alterations.

This approach clearly identifies the types of structural treatments that both DOJ and FHWA agree require curb ramps (when there is a pedestrian walkway with a prepared surface for pedestrian use and a curb, elevation, or other barrier between the street and the walkway) and furthers the goal of the ADA to provide increased accessibility to the public right-of-way for persons with disabilities. This single Federal policy will provide for increased consistency and improved enforcement.

![Figure 1. Maintenance versus Alteration Projects](image)

Source: DOJ Briefing Memorandum on Maintenance versus Alteration Projects

### 3.4 FHWA Guidance on Closing Pedestrian Crossings

The FHWA has provided guidance on closing pedestrian crossings. If an engineer determines the crossing is not safe for any user, the crossing should be closed by doing the following:

- A physical barrier is required to close a crossing at an intersection. FHWA has determined that a strip of grass between the sidewalk and the curb IS acceptable as a physical barrier.
- A sign should be used to communicate the closure.

The agency wishing to close certain intersection crossings should have a reasonable and consistent policy on when to do so written in their Transition Plan or as a standalone document. If safety concerns are established by an engineering study, a pedestrian crossing should not be accommodated for any user. The Township should also develop and implement a policy on how to close those crossings that are accommodated based on the existing conditions at the crossing location (e.g., existing sidewalk leading up to the curb in the direction of the crossing or existing curb ramp or crosswalk serving the crossing) but should not be due to safety concerns.
3.5 Prioritization

The following sections outline the prioritization factors and results of the prioritization for buildings, parks, signalized intersections, sidewalks, and unsignalized intersections. Each facility type has a different set of parameters to establish the prioritization for improvements.

3.5.1 Prioritization Factors for Facilities

Buildings have been prioritized into a “High” “Medium” and “Low” category. The Consultant Team recommends barriers to be further broken down and prioritized on a 12-point scale, which is defined in Table 1. This prioritization methodology has been developed by the Consultant Team to aid the Township in determining how the buildings should be prioritized for improvements based on the severity of non-compliance with ADA. It is not a requirement, but it has helped entities be more efficient in the removal of barriers by developing a “risk management” approach.

Parks are also recommended to be prioritized on a 12-point scale, which is defined in Table 2.

<table>
<thead>
<tr>
<th>Priority</th>
<th>Criteria</th>
</tr>
</thead>
</table>
| 1 (high) | • Complaint  
• Safety Issues (dangerously steep slopes, protruding objects, etc.) |
| 2 (high) | • New construction built out of compliance  
• Older construction severely out of compliance (see Accessible Route list for sidewalks, curb ramps/ramps) |
| 3 (high) | • No accessible parking  
• Accessible parking is not on shortest accessible route  
• No accessible route from parking to building entrances  
• No accessible route to adjacent sidewalk system, when provided  
• Severely non-compliant parking (bad slopes, gravel surface, etc.)  
• Entrance door clearance <16” on pull side  
• Entrance door exterior clearance >4% slope in any direction |
| 4 (high) | • No accessible route to covered areas inside buildings on site (no elevator to upper areas, steps only, narrow doors, etc.)  
• No accessible counter heights (reception counters, utilities counters, etc.)  
• No access to public areas (coffee bars, break rooms, conference rooms, smoking areas etc.)  
• No access to meeting chambers or court amenities  
• Gaps and grate openings >1/2”  
• Obstructed clear floor space  
• No grab bars  
• Interior door clearance <16” on pull side  
• Interior door clearance >4% slope in any direction  
• Lavatory height >35-1/2”; Lavatory centerline <14”  
• No lavatory/sink knee clearance where required  
• Protrusion >9” and <70” high  
• No accessible toilet rooms  
• No accessible showers  
• Interior floor slope >4% in any direction  
• Toilet compartment – door located in front of water closet  
• No ambulatory toilet compartment where required  
• Urinal rim >20” high  
• Public transaction counters >38” high |
<table>
<thead>
<tr>
<th>Priority</th>
<th>Criteria</th>
</tr>
</thead>
</table>
| 5 (medium) | - No visual fire alarms  
- Non-compliant parking (structural solution)  
- Non-compliant public access spaces (coffee bars, break rooms, conference rooms, smoking areas etc.)  
- Interior door clearance between 16” and 17-7/8” on pull side  
- Knob hardware  
- Door maneuvering clearance 2.1% to 3.9% slope in any direction  
- Lavatory/sink pipes are not protected  
- Lavatory/sink height >34” and <35-1/2”  
- No accessible locker room bench  
- Interior floor slope >2% and <3.9% |
| 6 (medium) | - Dispensers >54” high  
- Accessible toilet compartment door does not self-close  
- Door vision panel >46” high to bottom  
- Accessible toilet compartment does not have door pull on both sides of door  
- Non-compliant grab bars  
- Non-compliant showers/benches/changing areas  
- Non-compliant signage  
- No accessible storage cabinets |
| 7 (medium) | - Accessible route with moderate access issues (level changes that can be ground down or fitted with device)  
- Baby changing table >36” high  
- Accessible seating not integrated  
- Employee transaction counter >36”  
- Urinal rim >18 but <20” |
| 8 (medium) | - Coat hooks >48” high  
- Non-compliant drinking fountains  
- Grab bars >37” high to top  
- Protrusion >6” but <9” and between 70” and 80” high  
- Water closet seat >20” high |
| 9 (low) | - Non-compliant parking (striping, signage)  
- Non-compliant pay telephones  
- Dispensers, coat hooks >48” but <54” high  
- Less than required amount of accessible cabinets |
| 10 (low) | - Minor level changes, gaps or cracks in accessible route  
- Door vision panel >43” and <46” high to bottom  
- Knee clearance <27” but >26”  
- Urinal rim >17” but <18”  
- No visual alarm in employee work area  
- Water closet seat >19” but <20” |
| 11 (low) | - Non-compliant public phones  
- Coat hook no provided in accessible toilet compartment where provided elsewhere  
- Grab bars >36 but <37” to top  
- Protrusion >4” but <6” |
| 12 (low) | - Items covered under Safe Harbor  
- Other items not listed but within a reasonable tolerance, but still out of compliance |

</table>
| 1 (high) | - Complaint  
- Safety Issues (dangerously steep slopes, protruding objects, etc.) |
| 2 (high) | - New construction built out of compliance  
- Older construction severely out of compliance (see Accessible Route list for sidewalks, curb ramps/ramps)  
- Alterations that did not bring required elements into compliance (replacing playground surfacing with non-compliant material) |
| 3 (high) | - No accessible parking  
- No accessible route from parking to park entrance, sports complex or amenity served  
- No accessible entrance or sidewalk system to and around each amenity provided  
- Severely non-compliant parking (bad slopes, gravel surface, etc.)  
- Entrance door clearance <16” on pull side  
- Entrance door exterior clearance >4% slope in any direction |
| 4 (high) | - There is a sidewalk system around the park, but it does not connect to each amenity. (picnic tables, fishing piers, park benches, baseball, softball, disc golf, tennis, basketball, soccer, horseshoe, splash pads, skate parks, etc.)  
- Gaps and grate openings >1/2”  
- Obstructed clear floor space  
- No grab bars  
- Interior door clearance <16” on pull side  
- Interior door clearance >4% slope in any direction  
- Lavatory height >35-1/2”; Lavatory centerline <14”  
- No lavatory/sink knee clearance where required  
- Protrusion >9” and <70” high  
- No accessible toilet rooms  
- No accessible showers  
- Interior floor slope >4% in any direction  
- Toilet compartment – door located in front of water closet  
- No ambulatory toilet compartment where required  
- Urinal rim >20” high  
- Public transaction counters >38” high  
- No visual fire alarms |
| 5 (medium) | - Non-compliant parking (structural solution)  
- Non-compliant playground surface  
- Non-compliant playground equipment  
- Interior door clearance between 16” and 17-7/8” on pull side  
- Knob hardware  
- Door maneuvering clearance 2.1% to 3.9% slope in any direction  
- Lavatory/sink pipes are not protected  
- Lavatory/sink height >34” and <35-1/2”  
- No accessible locker room bench  
- Interior floor slope >2% and <3.9% |
3.6 Conclusion

The Township has completed the majority of inventory collection. The Consultant Team recommends the Township continues to look for, and remedy, barriers to access in an effort to ensure that the disabled citizens of the Township are given access to the Township’s programs, services, and activities.

To confirm follow-up on corrective actions required under the Transition Plan, the Township has developed an ADA Action Log, documenting its efforts at compliance with the ADA. The Action Log identifies items that are not ADA compliant and will include anticipated completion dates as the remediation plan is further developed. After the adoption of the Transition Plan by the Governing Body of the Township, the ADA Action Log will be updated on an annual basis. The ADA Action Log shall be available upon request.
4.0 Staff Training

Training was provided to Township staff to address some of the issues identified in the departmental surveys and interviews. The following training sessions were provided by the Consultant Team:

- August 3, 2017 – Disability Awareness and ADA Overview for Staff in Contact with Public (2 hours)

Descriptions of the training course is provided below:

Disability Awareness and ADA Overview for Staff in Contact with Public (2 hours)

This training is an overview of the access criteria and requirements mandated for State and local government staff interacting with the public. Best practices for sensitive and respectful interactions are explained. Communication topics include correct language and etiquette, appropriate use of terminology, and dealing with service animals in public places. The training concludes with a brief overview of maintaining accessibility for people with disabilities.

Township Staff in Attendance: 13

The Consultant Team recommends additional training is developed to provide job specific training in understanding the responsibilities of the ADA and best serving the citizenry with disabilities.

5.0 Facility Costs

5.1 Facilities Cost Projection Overview

In order to identify funding sources and develop a reasonable implementation schedule, cost projection summaries for the initial study should be developed for each facility type.

Table 3 provides a summary of the estimated costs to bring each facility into compliance.

5.2 Implementation Schedule

Table 3 details the barrier removal costs and proposed implementation schedule by facility type for all facilities evaluated as part of this project. This 5-year plan will serve as the implementation schedule for the Transition Plan data collected to date. The Township reserves the right to change the barrier removal priorities on an ongoing basis in order to allow flexibility in accommodating community requests, petitions for reasonable modifications from persons with disabilities, and changes in Township programs.

It is the intent of the Township to have its ADA/504 Coordinator work together with department directors and budget staff to determine the funding sources for barrier removal projects. Once funding is identified, the ADA/504 Coordinator will coordinate the placement of the projects in the Capital Improvement Program to be addressed on a fiscal year basis.

5.3 Next Steps

This document serves as the Americans with Disabilities Act (ADA) Transition Plan within the Township containing data collected to date. In developing this Plan, program, policies and procedures were reviewed for compliance with ADA guidelines and a review of the Self-Evaluation reports was conducted on the following facilities:

- 19 buildings;
- 10 parks;
- 0 signalized intersections; and
- 0 miles of sidewalk and all unsignalized intersections and driveways along the sidewalk corridors.

The recommended improvements have been prioritized and an implementation plan developed to provide guidance for the Township’s improvement projects in the coming years. Public outreach was also conducted to aid in the development of the plan.

It should be noted that this Transition Plan is focused on a portion of Township facilities, and is not intended to be a comprehensive ADA Transition Plan for all Township facilities. As funding becomes available, additional facility evaluations should be completed to provide a comprehensive Transition Plan for the Township.

First, we just want to thank you all for being here tonight.

We are trying to get input from the community in helping us formulate a Transition Plan to make sure that we are meeting the needs of individuals with disabilities in the township.

We have with us tonight some representatives from Accessology, which is the company that we selected to help us with our transition plan.

We sent out a formal request for proposal, got several responses from that, went through a competitive process and selected Accessology as the company that would best meet the needs for the township to help us in formulating a plan for the community and for all of our facilities and programs that we offer.

Tonight you guys all signed in, hopefully, so we have your information.

One of the things that we want to do after tonight is to form kind of an ad hoc Advisory Committee to help us on an ongoing basis. So if, before you leave, if
instead of having you fill out a whole other form, if you would just put yes or no next to your name so we know if you are interested in that or not, and then we will follow up with you after that.

Any questions before we have Accessology come up here tonight?

Okay. With that, we will have our representatives come up, and thank you all for being here.

Rest rooms are just across the lobby here on the right-hand side, if anybody needs the rest room.

There is water out on the counter as well. Would anyone like a water before I sit down? I will go grab you one.

No?

Okay.

Thanks.

>> KRISTI AVALOS: Well, good evening!

My name is Kristi Avalos, and I am President and CEO of a company called Accessology, and all we do is access.

So we are not a firm that does 17 other things and access is one of them. That is our focus, and I have been doing access since 1977, which means I predate the ADA.

I was part of the regulatory negotiation process for the development of ADA. And Steven Lewandowski and I are going to be doing the presentation tonight just to let you get up to speed with where the township is and, more importantly, where the township is going.

So I first want to applaud Canton Township for taking on this project.

It is a very, very important project.

And it is one of those things that I think a lot of entities just want to shy away from because it can be very, very expensive, and yet they have put a lot of time and a lot of effort into making this happen, and so I am very pleased to be working with the township.

We also have several members of the township here, so when questions happen that are township related, we have got people here who can help answer questions.

So having said that, I kind of want to get everybody on the same page.

And let's start with a PowerPoint that gets on the same page.
We are going to -- we have kind of done some introductions. We are going to talk about the goals and objectives of developing an ADA transition plan.

What are the federal requirements? What are the tools and the process that is being done? What the scope of this phase of the project is, and then really what is next. Okay?

We have done some introductions as the consultant team. Did you want to do introductions of the staff as well?

>> We do have a lot of staff here. Can go ahead and say their names. That would be great.

>> KRISTI AVALOS: Say that again? I am sorry.

>> It would be great if everybody gave their name. I am Brad Sharp.

>> I am Kerreen Conley, ADA coordinator.

>> Barb Brouillette, HR manager -- HR supervisor. She is HR manager. Just joking! Just kidding!

(Laughter.)

>> Sorry.

>> Erika Hidalgo with Engineering Services.

>> Gregg King with Facility Services.

>> Joe Kocinski with Information Technology Services.

>> Eric McDaniel, Information Technology Services.

>> Pat Williams, Canton Township supervisor.

>> I am Jen Provenzano, Recreation Supervisor.

>> I am Derek Brooks, Facility Services. (or Leisure Services?)

>> And I am Jon LaFever, Deputy Director, Leisure Services.

>> KRISTI AVALOS: I think that is everybody.

So what that should show you is the commitment that the township has to this project.

We have done several projects where we have one, maybe two representatives from the municipality, itself, and so again I applaud their effort.
Obviously the township's interest is to improve accessibility for all citizens. Accessibility is one of those things that has grown over the years. ADA came out in 1990.

When it came out in 1990, it was mostly for people who had mobility impairments because architecturally that was the most difficult, you know, challenge for anybody that had facilities.

But in 2010, when they revised the ADA, they did a lot of work on improving service for people where sensory impairments.

They recognized technology has changed from 1990 to 2010.

Twenty years of development.

And so there are a lot of things that became new in 2010 that weren't in the original ADA.

And so part of what we have been doing is working with the staff to educate them as well on the various responsibilities that they have, but we also like to educate the disability community on different ways that you can participate to make things easier in the community that you live in, and certainly participating on an Advisory Board is right up there on the list because it gives you a voice that is very, very important to the decision makers.

Now, federal requirements fall under Title II for an entity that receives public funds.

So basically every city, every town, every school district, every university, every county, every state agency, they all fall under Title II, and the requirements of Title II make sure that everything that they have, they have for everybody.

And that is really what the whole purpose of it is. If we drill it down, that is really what it says.

If they are offering a service, they are offering that service for everybody.

And sometimes that service will look a little bit differently based on what the service is or what the program is.

And that is part of the transition plan is looking at everything, looking at what do we offer and how can we offer it better for people who have varying disabilities.

So the requirements for doing this have changed.

They evolve just like we evolve and that kind of thing.

It is a requirement that they have a grievance procedure.
And the township has a grievance procedure and a grievance procedure is something that tells you as citizens where to go if you have a problem. If there is something that the town isn't doing the way that you think that they should be doing, it gives you an avenue to take it to, and that avenue will ultimately get to their ADA coordinator who will help make decisions based on whatever the circumstances are.

And so the grievance process is something that you need to know about, be familiar, and utilize because it documents the things that the township needs to address. Just telling somebody in a meeting may or may not get to the right people. But the grievance process is set up to go to the right people. Okay?

It also requires that a Title II entity has an ADA coordinator. And we mentioned before that Kerreen is the ADA coordinator, so she has the ultimate responsibilities for the township, but the way that they have set it up is they have a person in every major department that is -- we call them the ADA liaison so that we have expertise for that department.

We don't have somebody who is in HR trying to figure out how to build a curb ramp. We have people who build curb ramps every day that are handling that piece, and they just communicate within the department, so they have set up a really good information and communication structure within the township that is really going to help.

And then the Transition Plan is something that is required and it is required if structural changes are going to be necessary in facilities or in their program services and activity.

So they are required to perform a self-evaluation, which is a very huge undertaking, because they have to look at every single building, every single piece of sidewalk and curb ramp and intersection and program and service and policy and practice and everything that they have.

It is a very invasive process. And a lot of entities started this process back in the early nineties and are updating it at this point, and that is a good thing because a lot has changed since the early nineties.
Another part of the federal requirements for Title II ensures that people with disabilities aren't excluded from anything.

And so if somebody has a -- oh, let's say -- a good example is if the library, local library said that you had to have a driver's license in order to check a book out. Anybody with a disability that doesn't drive would be discriminated against because they don't have a driver's license.

And so those kinds of policies get looked at to make sure that there isn't a discriminatory practice in place.

Anything that has been built since January 26, 1992 is required to be built in compliance with the ADA. And so at this point, they could have a building that is twenty years old that is still considered new under the ADA.

And those need to be evaluated, and the township has done an evaluation of the facilities. And our role is to help take the information that we have gathered for the facilities and get it into the overall Transition Plan and to prioritize it.

So, for instance, if we have got a curb ramp that has a -- the maximum allowable slope of a curb ramp is 8.3%.

If we have a curb ramp that is at 18%, it is clearly a violation.

Now, if that curb ramp were in a downtown area or right next to a city building, that is going to be a higher priority than if it is out in a rural area where there isn't any pedestrian traffic.

That one is still bad but we have to prioritize. So as they are spending their money, they are spending it intelligently on the areas that affect people with disabilities the most, and so we start with the most populated areas and the places that have the most pedestrian traffic and that kind of thing.

Now, it does not require -- the ADA does not require that they undertake anything that would cause a fundamental change to the service or the program.

And the best example of that isn't really a city example but let me just give you an idea.

If you go to a laser tag place -- a lot of people have been to laser tag and it is dark and they have lights that are blinking and they have, you know, all kinds of things to do.

But if you have got a seizure disorder, those blinking lights could cause a seizure. So if a person who had a seizure disorder went to the laser tag place and said, look,
I need the lights to stay on in order for me to participate so it doesn't turn into a seizure, they are changing the experience for everybody else.

So if all of these people paid for the experience, and now the lights have to be on, then they are getting a different experience than what they paid for.

So an accommodation might be where they say, I will tell you what. Come back at 8:00 with all your friends and we will do a special event with the lights on for you and everybody else, and that might be considered reasonable.

So that allows them to provide the service, but not take away the fundamental experience of it for everybody else.

And so those kinds of things have to be looked at.

If somebody needs a specific type of accommodation, how can we accommodate somebody and at the same time not change a fundamental service?

We also have to make sure that accessible routes and accessible features are maintained in accessible condition, so part of doing a reevaluation after a number of years is to make sure nothing changed.

Soil changes, concrete changes, tree roots grow. There is all kinds of reasons why something might change.

So the self-evaluation process like I said, it is pretty -- it is pretty in-depth.

We are looking at every program and every service and every activity, and we are looking not just for the physical barriers but practices and procedures and policies, communicating with the public, what are their overall communication services? Do they have closed captioning on videos and TV that they do?

The emergency plan, does the emergency plan include people with disabilities?

So all of that kind of thing has to be looked at to make sure.

And so part of the Advisory Board is helping to make sure that they are getting your perspective, okay?

The key element is making sure that we have like an executive summary, but making sure what is important. It is one thing to list everything that is wrong, but that is just an inventory and so we don't want just an inventory. We want plan.

And so we have to look at not just the list or the inventory, but we have to look at how we are going to fix it, when we are going to fix it, who is responsible for fixing it, and it needs to be put into a priority that makes sense for the taxpayers and their money to be sure that the money is being spent on the most egregious issue.
They do have to have an ADA coordinator, which we mentioned before. They are going to have to look at funding sources. When we start looking at everything, it is going to -- there is going to be a dollar amount attached to that, and it is going to be pretty significant, and it is in every community and we do this all over the country, and there is always sticker shock when they see that dollar amount.

But as it has worked out over periods of time, it becomes a manageable project. There is a requirement by the ADA, the Department of Justice, that they communicate with their local disability community.

This is one way to do that, having an open meeting like this. Another way is setting up the Advisory Board. Another way is putting together some type of a survey that goes out around the township for people with disabilities to be able to respond who might not have been able to come tonight, and so there are a lot of different ways of doing that.

And we will get input from you on what you think is the best way to do that. I mentioned that there was a grievance process in place. And once the Transition Plan is complete, it needs to be public. It needs to be something that you can find and read and, you know, comment on.

And so that process will happen as well. And then it is really a question of just monitoring it, making sure every year there are dollars that have been set aside specifically for improvements, that they are doing what they can be doing internally on policies and practices, that they are listening to their Advisory Board and that they are continually moving forward.

It is a living document.

I don't think anybody will ever be done.

I don't think anybody will ever be complete when it comes to accessibility because things will change.

And so there will be a maintenance and, you know, an ongoing process.

Now, Steven is going to come up and going to kind of talk about what our scope was as part of this.

This is just a phase of what is happening, so he is going to kind of go into what the scope is and the next steps and that kind of thing.
I will -- we won’t bore you with in-depth detail on every single thing, but we will go over our project, what our project scope was for this particular phase of the project.

We did look at policies, internal departmental policies as well as the publicly published policies.

All the documentation that affect the public, whether it be a form, a job application, a request to participate in a program, all of the forms and documents that the public sees and uses on a daily basis.

We did review the website. It was a cursory review, so we essentially ran it through a text web browser to see if that was functional.

We did review all of the program procedures per department and we also reviewed the emergency procedures that they currently have in place.

Also we reviewed all of their facility assessments that they completed in 2014. They evaluated thirty facilities at that time, and we have looked over all of that data and made some recommendations.

Also a site assessment that was done on each of those facilities that included parking and sidewalks.

We looked at their neighborhood sidewalk replacement program to see if there was any compliance issues with those.

Their sidewalk gap program, pedestrian trail plans, and their pedestrian signals that were under their jurisdiction.

Now, as far as -- once we evaluated all that information, we had -- our scope was to come up with some next steps for their -- to get actually into this development of this plan.

As far as the facility evaluations that were done, there is a lot of data that they have collected in 2014.

We are going to recommend that they start prioritizing that data, assigning costs to those improvements that were identified as needed, and then developing what we call an action log, which is basically a list of improvements, and then every year they start dedicating dollars to start making those improvements.

We also want to verify that they evaluate anything that was done or constructed since 2014. There have been things that have been built since 2014. We want to
make sure those get input into the plan and those elements are documented.

And then we also want to have a schedule.

We want to know if this is going end up being a five year plan, a ten year plan, a twenty year plan.

We are not there yet.

We need to start prioritizing the data and seeing, you know, what that schedule might be over the number of years.

And we did review a lot of documentation.

These are just some basic things as far as next steps that the township needs to do.

Essentially every form, every document that the public has access to needs to have some way for those individuals to request an alternative format, whether it be a braille document, a large text, whatever that person needs to view that document.

It is an easy change. It is just updating some forms, but it is something that is the next step for the township to do.

Making sure all their videos are closed captioned. Right now they are as far as -- based on our investigations, they have been or they have a transcript available. So so far they have that. We just want to make sure that they keep implementing that over the time.

Meeting agendas, the same type of thing. Want to make sure there is a reasonable request statement on every public meeting agenda so that everyone is aware that if they need an accommodation, who to contact, how far in advance, that type of thing.

If we need a sign language interpreter or CART service, they can make sure that is available.

And they are also required to have an ADA notice, which we have currently.

We are going to recommend they make some updates to their website to make it a little more visible.

It is there. Just a little difficult to find at the moment but that is an easy fix.

We are recommending that they actually have an ADA section of their web page where they can post their Transition Plan, all of their ADA procedure.

As Kristi alluded to before, they do have a grievance procedure. We do have some minor adjustments to it. Do have it on their website. Encourage you to read
that if needed.

The township does have an emergency operations plan. We did not review it under our current scope of work.

However, we are going to obtain that here in the near future so we can provide some comments on that.

That is a brief overview of our scope.

So we will open it up to anything we want to talk about, whether it be specifics on the scope of work, what the township is doing, if we have specific issues in the township.

>> KRISTI AVALOS: And let me kind of open it by saying this.

Often what is -- what we think is the highest priority when we start prioritizing things may not be your highest priority.

And so getting input as to the things that you think are important out of what we are looking at, or areas where you have a real hard time getting around, all of those things will be very valuable information for the next steps.

Don't be shy.

>> AUDIENCE: I was just curious, is this specifically to township entities, buildings, streets? Does it go out to the businesses that are within this community? Are they required to meet these -- the ADA.

>> KRISTI AVALOS: They required to meet it.

Steven, I am going to have you repeat the question.

>> STEVEN LEWANDOWSKI: I am going to repeat it. The question is to what extent does it affect the township? Is it only township, or extend to the community, businesses, sidewalk, that type of thing, correct?

>> AUDIENCE: Correct.

>> KRISTI AVALOS: Let me get to the microphone because they recording.

>> STEVEN LEWANDOWSKI: I think you can just talk into any of those.

>> KRISTI AVALOS: All right.

They are all on.

There is Title II and there is Title III.

The township is a Title II entity.

All of the private businesses that make up your community, those are Title III. They have to comply with the ADA.
But the township isn't responsible for what they do because it is all private funding, private money.

So we have made a recommendation that the township has -- kind of a here's what you are required to do, you know, document or brochure, right.

>> AUDIENCE: Kind of --

>> KRISTI AVALOS: Yes, making them aware they have to follow the ADA and all of that, but really aren't responsible for the private building. So what needs to happen is you need to educate them. The community -- the way that they learn is through the community. And when you find something that doesn't work for you, for whatever reason, you know -- if you have got somebody who is blind and they go to a restaurant and they don't have a braille menu, that is something that needs to be brought to the attention of the owners. And that is part of how ADA was set up, for you to be able to say, look, I have issues there.

That is not what this process is for. This process is specifically for the facilities that are owned and under the purview of the township.

Okay?

What else?

>> AUDIENCE: You had mentioned that this process is a requirement of the ADA and happens periodically as the township may find need.

I was just wondering how long ago Canton has done this or if they have ever done this before.

>> KRISTI AVALOS: Want to repeat the question?

>> STEVEN LEWANDOWSKI: Yeah. She is asking has the township -- have they ever done a Transition Plan before, prior to this project, right?

>> AUDIENCE: Right.

>> KRISTI AVALOS: I am going to let somebody from the township answer that.

>> We haven't followed the Transition Plan formula that we are working on right now.

This is something that we are for the first time starting, but we have had the ADA since 1992, early nineties, a plan placed.

It was not a Transition Plan.

>> KRISTI AVALOS: Once we take this and we make it into kind of a living document, that prevents them from having to keep redoing it, so again we are
smarter now than we were in 1990.  
So in 1990, a lot of entities did a plan and that plan sat on somebody's desk and some things got done and they put procedures in place so that every time they did something, it complied, but they didn't -- you know, they didn't know what they were doing back then in terms of developing a plan.  
And now making a living document that is electronic -- we didn't have, you know, all the electronic availability that we have now back in 1990.  
And so making something that is electronic and followable will prevent them from having to keep doing this every, you know, five or ten years.

>> AUDIENCE: Okay.
Thank you.

>> AUDIENCE: Me and my wife walk a lot.
But the sidewalks, there are sidewalks and no sidewalks. Is there any way to fill in the sidewalk gaps?

>> STEVEN LEWANDOWSKI: The township does have a sidewalk gap program, correct?
Speak about that.

>> That is correct.
Every year we fill in the sidewalk gaps. We have a plan. We go to the different parts of the community each year and we do have a specific plan for connecting as much as we can.

>> STEVEN LEWANDOWSKI: So if there is a specific area you are concerned with, you need to let them know so that they can work that into the next phase of their.

>> KRISTI AVALOS: Can you repeat that question into the --

>> STEVEN LEWANDOWSKI: He was asking, you know, did they have a sidewalk gap program to fill in missing sidewalk, and they do. It just depends on what section of city or town they have selected for that particular year to add.

>> AUDIENCE: Mainly had a question about what to do for 911 calls for the hearing impaired.

>> STEVEN LEWANDOWSKI: So the question is about what does someone do about 911 calls if they are hearing impaired.
Kristi, do you want to talk to that?
KRISTI AVALOS: That is something that is going to be in a future phase, but there is a lot of 911 technology now that is available for all communities to be able to connect either a TTY or other types of technology to their 911 system.

We have not evaluated that for the township yet but we expect to be doing that here at some point in the near future.

If you have comments, issues or problems that you want us to know about, please don't hesitate to let us know.

AUDIENCE: Okay.

AUDIENCE: The access to ramp around the school has too many turns in it. The access to the ramps has too many turns.

Around the school, it has too many turns. They should have one out front where it is straight in. Not on the side.

At the school --

If there is a specific spot, will be happy to meet afterwards and talk about that.

STEVEN LEWANDOWSKI: Yeah. If it is a very specific location, we can have a side bar about what that particular instance is.

Okay.

STEVEN LEWANDOWSKI: You may already know about what it is.

Cherry Hill School.

We did a lot of work at Cherry Hill school a few years ago.
The existing ramp has twists and turns to get up to as opposed to --

AUDIENCE: No, want to get straight in, has turns.

Inside the school.

He is referring to inside the school.

Oh, okay.

It is so narrow.

Yes, historic building. We did do some remodeling for the bathroom, but we will have to look at that specifically.

STEVEN LEWANDOWSKI: It is an historic building and it seems to happen wherever the entrance is. There seems to be an issue with clear width.

Okay.
AUDIENCE: Returning to sidewalks for a second, on main streets like Warren or Ford or Morton Taylor, you have areas that cannot be passed in a wheelchair. You can't do it. And they have been that way for years. Who is responsible for that?

So some of the roads are state highways and some of them are county. Because we are a township, that is the way it is set up.

Are you concerned with a specific crossing, being able to cross?

No, just use the sidewalks.

STEVEN LEWANDOWSKI: The width of the sidewalk, might be telephone poles.

Areas heaved up, and it has been painted red and a marker. I assume the township did that.

Yes.

But you still can't get through with a chair.

Right. If we marked the sidewalk, typically we will mark the defect and we place it on the program.

We will also notify the owner to do some type of temporary patching or leveling of that slab so that -- before we get in there to do the work with the sidewalk repair program.

That is on -- but not on the main street.

On the main roads we do the same thing. We get a complaint and we know it is a specific area --

Marked it in 2015.

Okay.

We probably did it, then, if it was marked. It should be repaired.

No.

No?

No.

Where at on Warren?

Warren between -- just to the west of Morton Taylor, just the other side of that and west.

There is a gap about that high.
On the north or south side?
South side.
South side.
Okay.
I will look at that.
And there is one on Morton Taylor south of Republic on the west side that you can't get to at all.
And you can't get to at all because it is an embankment that falls off. If you would take the chair out on the grass, you are going over.
Okay.
Thank you.
KRISTI AVALOS: That is what I was saying a few minutes ago, that kind of specific information, because we know it affects somebody on a daily basis, that becomes a higher priority than something that we know needs to be fixed but nobody has actually said that it is a problem for them.
AUDIENCE: Is that the type of thing that would go in a grievance?
KRISTI AVALOS: Normally, yeah, that is one of the things that the grievance process would be for, so you can say look where I am. I can't pass this because -- and that goes into the grievance process, which elevates it in the overall system.
Now, we are documenting this tonight.
And so, you know, we will work with the township to make sure that that is something that gets addressed as quickly as possible.
AUDIENCE: Thank you.
STEVEN LEWANDOWSKI: Yes, sir?
AUDIENCE: Now I forgot.
STEVEN LEWANDOWSKI: We will come back.
AUDIENCE: Oh, who is responsible for curb cuts in the neighborhood?
STEVEN LEWANDOWSKI: The sidewalks in the neighborhood?
Curb cuts.
STEVEN LEWANDOWSKI: Curb cuts?
Oh, the curb ramps, who is responsible for those?
In the neighborhoods?
Who is responsible for the curb cuts in the neighborhoods.

That is generally the county or the state that has jurisdiction of where those curb cuts are located.

If we have a curb cut that is there, and there is no receiving ramp, then that is evaluated whether we need to put one in or whether we remove it in its entirety.

Specific concern, we will be glad to take that information and make sure we go look at those specific areas.

STEVEN LEWANDOWSKI: Yeah. Outside there was a comment form, so if you have specific locations that you want to write them down -- if you need assistance, we can certainly help you document that and then we can submit that, keep that with the town records so they can be aware of those issues, those specific areas.

AUDIENCE: Since we are dealing with sidewalks, I am just going to pile on. (Laughter.)

Explain to me how it works with snow removal because I live on along Ford road, and I live in Canton Manor, which is one of the two high rises, and I know that the next door neighbors, they have shared with me that they have a lot of problems with traversing the sidewalk along Ford Road on the same side they are on, and getting across that bridge right there to get to Meijer's to do shopping during the winter because it is covered in snow.

Does the township -- is it a similar jurisdiction issue with the snow removal as with the sidewalk?

Like why are some places heavier than others?

There is an ordinance related to snow removal, 24 hour period in specific areas, with a complaint, and go monitor that specific site, but that is how the ordinance is written. Adjacent property owner is responsible.

KRISTI AVALOS: So once again we have comment forms. Put those specific locations on the comment forms so that they can be looked at.

AUDIENCE: So what is the repercussion to --

The pinch point there is on Fellows Creek.

INTERPRETER: Could you repeat?

There is a walkway over Connors -- Tonquih (for sure check this. Didn't understand)
Is that a sidewalk gap or --
There is no adjacent property owner.
That drain -- might not be a specific problem next to it.
Nobody --
Have to look at that specifically so --
Oh, I have been there five, six years and that has always been the one spot that will stop you, and some of these people, there is no way they are going to get food.
That is good information, and we will take the information and look at that area specifically.
Is that the spot you meant?
That is the spot you say you were referring to?
Um, no.
I don't think so.
The spot I am referring to is along Ford, right before Meijer's.
The creek --
Oh, okay. I wasn't sure that is what it was called.
Fellows Creek.
KRISTI AVALOS: What is the name of it?
STEVEN LEWANDOWSKI: Fellows Creek, across Fellows Creek.
It ends up there, but it starts way up Ford Ridge.
I had a question in regards to cars that are parking over the sidewalk on driveways.
Is there an ordinance or anything that says they shouldn't do that because I have seen people that can't get past or they end up going into the street and then they can't get back up again.
STEVEN LEWANDOWSKI: The question is what about vehicles parking across the driveways that block the sidewalk.
I don't recall an ordinance for that.
It has been a while since I have looked at those.
There is an ordinance related to that. We would have to review it with you guys to see what can be done.
STEVEN LEWANDOWSKI: We have seen it in other municipalities where they
do have an ordinance where it is prohibited and the business or owner or whoever gets ticketed for blocking the sidewalk.

>> Have to look at it.

>> It exists.

>> STEVEN LEWANDOWSKI: Apparently there is an ordinance that prohibits that, so if there is a situation like that, you would make an ordinance.

>> Contact the local public safety officer.

>> STEVEN LEWANDOWSKI: Public safety.

Yes, sir.

>> In the State of Michigan, handicap parking is a fine of 120 bucks if you violate that.

>> STEVEN LEWANDOWSKI: Okay.

>> Although local municipalities are not required to enforce it.

I don't know why that is but that is the way it is.

Is there any policy in the township of Canton that we do not enforce handicap parking?

>> Not aware of a policy.

>> Have you ever seen a ticket, ever?

>> I have not personally.

>> I have looked.

Because I end up parking miles away.

>> Have to look at that.

We will take that down as a consideration and take a close look.

>> STEVEN LEWANDOWSKI: There isn't an ordinance?

Maybe there needs to be one -- we would have to look to if there is an ordinance. May be one.

>> KRISTI AVALOS: A lot of times we find that ordinances that over time have just kind of got forgotten about and part of this process is bringing those back up to the surface to make sure they can be enforced.

And so, you know, that is something that we can look at and make recommendations.

>> But this is a state law that says this is what you do, but it is not mandatory. And many municipalities do not intentionally enforce.
I am trying to find out if Canton does not intentionally enforce it.

>> KRISTI AVALOS: Okay.

What else?

>> Speaking again.

Springboard off your point, transportation is a big thing for me because I no longer drive, so I use Canton Mobility, as I know a lot of us do, and while it does -- it does help to a certain extent, it -- you know, the service hours and service areas being relatively small make it very difficult to accommodate for work, to accommodate for, you know, going out to dinner with your friends, going to specific engagements, like I can't attend town meetings here because they are usually after five, which is when Canton Mobility --

>> STEVEN LEWANDOWSKI: That was one of our things to make sure there was transportation.

>> I can't visit my state representative during her coffee hours because she has them at 7:00 p.m., two hours after Canton Mobility closes. And I know that it is very hard for people who live outside of Canton Township to work here, to shop here, to, you know, XY or Z, because para-transit bus routes that are mainly controlled by the SMART service, they will not come here.

It is like when I was looking at moving back home, which is seven minutes away down Ford Road in Westland, I called them and I said, oh, would you get me to the Canton Summit, you know? How much would it be, you know, set that up? And they said, oh, no, we don't go there.

So in order for me to keep my job, I had to live in Canton.

And, I mean, I love my home and I love Canton as a community and I appreciate the transportation.

That was -- that was limiting and I feel like there -- maybe some creative lens needs to be looked at for how do we expand it both for the people who live here and for the people who don't who want to come here and, you know, be a part of the fabric of Canton, even if just for the day.

>> STEVEN LEWANDOWSKI: I am not sure if I can respond to that other than we will make -- I am sure Kristi has documented that in the notes about expanding Canton Mobility, its serviceability and possible hours.

>> KRISTI AVALOS: And that is the kind of thing that often will come out of the
Advisory Board where they say, okay, this is not working for our community.

What can we do?

So that is -- again, I am going to keep pushing this Advisory Board because that is the best way --

>> Canton Mobility Advisory Board?

>> KRISTI AVALOS: Pardon me?

>> Canton Mobility Advisory Board?

>> STEVEN LEWANDOWSKI: Well, they can work together, too.

>> KRISTI AVALOS: Yeah, they can absolutely work together.

>> Maybe I can help with something here as well.

When we had the Canton Mobility study session, Robin and others, when we had the mobility session with the trustees, that became part of our conversation.

And with that, it is purely a function of budgeting if we want to expand the services.

And so going into budget season now and will be occurring over the next couple months, so reach out to your trustees and share with them what you want.

>> Thank you for that.

>> I have a question for the Canton people.

How many buses do you have in service?

>> He is asking how many buses we have in service for the Canton Mobility program.

>> That I don't know.

>> There is five currently. There is five buses that Canton Mobility operates when they are running and not in service.

>> When they are running --

>> Which is a challenge.

>> Yeah.

>> STEVEN LEWANDOWSKI: So another question from Maureen, and Maureen's question is about the models, new construction, new homes, not having ramps to the houses and that is -- so the question is about --

>> Access to model homes.

>> Access to model homes, new homes.

>> STEVEN LEWANDOWSKI: That is a tricky subject.
KRISTI AVALOS: Actually the ADA now covers access to model homes, and they are required to have access into the front or into the building.

Okay?

Whether it is through the garage or whether it is in the front door, they do have to have access into the main level.

But they don't obviously have to have elevators if it is a two story home.

Just a ramp.

KRISTI AVALOS: Just a ramp to get into the main entry?

Yeah.

KRISTI AVALOS: Yeah, they are required to have that.

But we never seen one.

STEVEN LEWANDOWSKI: Right.

Usually there is -- at least the model homes I have been in have their sales office or -- that part of it is a public accommodation, so it should be compliant.

KRISTI AVALOS: Yeah, and if it is not --

AUDIENCE: They don't have a ramp, so I need somebody in there to help me lift up.

STEVEN LEWANDOWSKI: Lift up to get inside.

Yup. They have -- definitely if they have a sales office or something in there, then it should be accessible --

KRISTI AVALOS: That is a violation and a lot of -- because the ADA doesn't cover single family private residences, a lot of times the people who build single family private residences don't even think about the ADA, and that is why their model homes are not compliant.

However, the model homes are a place of public accommodation and they do fall under the ADA.

So a lot of times that is educating -- it is about educating the builder because they just don't know.

Okay.

STEVEN LEWANDOWSKI: Yeah, that is a Title III.

If it was in the township, it wouldn't be township responsibility.

It would fall under the Title III of the ADA.

Not the builder --
STEVEN LEWANDOWSKI: Yeah, the builder, whoever owns that particular property would be responsible for that.

Might I add something to that?

STEVEN LEWANDOWSKI: Sure.

If we know the specific models or the site that you are looking at, if you let us know -- I mean typically what we do is our building official will look at the model homes and make sure they have parking for handicap, and they also try to make sure that there is access to get in there through the garage or through a door so you can at least view the model.

So I would think, if you have any issues on a particular site development, that you get with our building official and let them know because we have made sure that most of the new developments, they have access.

They all have parking, yeah, but no access into it.

Good point. Again, that is an education process so maybe that is something that the building official can do to educate the builders.

Again, we would be happy to look at a specific site and do what we can.

All right.

Is that part of your coding, when they develop the property, make an effort to let them know this is something that we don't tolerate, has to happen.

It is very easy to ask through the building and planning department, so it is an easy one.

Yeah, that is an easy one.

STEVEN LEWANDOWSKI: Anything else?

KRISTI AVALOS: Did we wear you out?

STEVEN LEWANDOWSKI: Feel free to comment all you want on those comment forms.

We will have our contact information, Kerreen's contact information.

There is a grievance procedure in place with the township so if you have any issues, be sure to utilize that process.

It is to document these issues and make sure they are taken care of.

KRISTI AVALOS: But please, please, please put the specifics that we talked about tonight onto the comment sheets so that they can find those areas that are specifically a problem for you and, you know, we can figure out some answers on
how to address those.

>> STEVEN LEWANDOWSKI: Yes.

>> Hi, I have a question.

I know the program -- you all speak basically a lot of physical barriers.
Do you all work with or have contact with like subsidized houses for disabled
senior citizens?

>> STEVEN LEWANDOWSKI: So the question is do we have any -- basically
anything to do with subsidized housing for senior citizens.

>> Excuse me.

The reason why I ask is because a lot of senior citizen buildings do have a lot of
senior citizens that is low income or have limited income, and a lot of these senior
buildings don't have programs set up where it is accessible to the seniors.

>> STEVEN LEWANDOWSKI: Okay.

>> I know that some of the low subsidized programs want you to get online, go
on the Internet. Well, some senior citizens don't have access to the Internet and
computers and things like that, so how are they able to be subsidized because some
of the senior citizen buildings are charging senior citizens the same amount of rent
as they do some other apartment building that might be down the street that is not
senior.

So, I mean, do you all kind of look at it to make sure they are able to be able to
afford to be in a senior citizen and not have to move, you know, back into their
home with relatives or something like that?

>> KRISTI AVALOS: This particular process is specifically for things that the
township owns and --

>> STEVEN LEWANDOWSKI: Operates.

>> KRISTI AVALOS: And is responsible for.

>> Oh, okay.

>> KRISTI AVALOS: If the township doesn't have a housing program -- and you
probably are talking about a county housing program, but the county housing
program is required to comply.

They receive funding from the Department of Housing and Urban Development.
And, therefore, there are requirements for them in order to receive that federal
funding.
And so the county should be going through a similar process of developing a Transition Plan and that kind of thing.

But the county -- and correct me if I am wrong.

>> That is correct.

>> KRISTI AVALOS: The county is going to be the one that is going to be responsible for that.

>> That is for all senior citizens building.

>> Low income.

>> KRISTI AVALOS: It is based on a program, a housing program, and the township doesn't have a housing program?

>> No.

>> KRISTI AVALOS: I didn't think so, so it is not a township run program.

It is a county run program.

>> County.

Yeah.

>> KRISTI AVALOS: And so the county would be the one that should have some answers for you.

>> Also, I learned just a few week ago, there is also a state subsidy program for -- the State of Michigan has written $1.3 million worth of rent and house payments in Canton Township specifically in the last 12 months, and so the clerk's office has how to apply information.

But again, not technology savvy, they need help.

>> What about the seniors -- how are they going to get that information?

>> They are going to need help.

>> So to me I was thinking, you know, the senior building should already have a program set within the building, guidelines that when they have a senior come and apply, they could apply for the program also, you know.

>> KRISTI AVALOS: I absolutely agree.

That -- but that isn't a program that the township offers.

>> Right, it is the county.

>> KRISTI AVALOS: And so what you would want to do is talk to the people over at the housing department for the housing and, also, there are state programs, and push it through that way.
Okay.

KRISTI AVALOS: And if you need my help, my contact information is there. I kind of make those phone calls a lot.

Okay.

KRISTI AVALOS: And so I know how to get through that system.

Thanks, ma'am.

KRISTI AVALOS: Okay?

STEVEN LEWANDOWSKI: Yes.

I like Canton, but I know there is a shortage of low income housing, only middle and upper income housing --

STEVEN LEWANDOWSKI: There is a shortage of low income housing. There is only middle and upper income housing.

The last remaining one is Lincolnshire apartments.

I mean housing.

STEVEN LEWANDOWSKI: Just housing.

Not apartments.

Okay.

STEVEN LEWANDOWSKI: Just housing.

Is there anything else?

They might have something afterwards.

KRISTI AVALOS: Pardon me?

STEVEN LEWANDOWSKI: I said they might have something afterwards --

KRISTI AVALOS: Any other questions? Any other thoughts, comments? Don't forget to sign up to be on that Advisory Board.

Just, you know, put something next to your name so that we know you are interested, and don't forget to fill out the forms that we have for getting additional information to the township.

And other than that, thank you so very much for your time tonight and your input. And if you think about things later on, go ahead and take some of the comment forms with you and fill them out and get them back to the township so that they have them.

We are also going to have a survey on the website. Can fill it out, do it electronically as well at home.
We are going to have it up there for another month.

>> STEVEN LEWANDOWSKI: It is the same document that you have currently in hard copy.

It will be online here shortly.

<td>Buildings</td>
<td>The Consultant Team recommends the Township to use the data gathered as a living document to avoid having to recollect data every four to five years as recommended by the Department of Justice. With the data digitalized and used as part of the annual planning, no recollection should be necessary except for verification purposes. The Consultant team further recommends the process is fluid enough to allow changes based on requests from citizens or changing conditions. A low priority item could become a high priority item over time. This also indicates the need for ensuring the maintenance team is properly trained to catch level changes as they occur and keep foliage from growing over or into an accessible route. The Consultant Team recommends that the deficiencies identified in the 2014 facility evaluation reports be placed into the overall remediation plan and monitored on a regular basis.</td>

**Canton Township of Canton's Response**

Canton is a Township form of government and therefore Wayne County Department of Public Services (WCDPS) has jurisdiction over all of the local roads in Canton, with the exception of Ford Road (M-153) and Michigan Avenue (US-12) which are State Highways under the jurisdiction of the Michigan Department of Transportation (MDOT).

In 1998 a decision by the Michigan Supreme Court made sidewalks within Townships the responsibility of the local Township Government. In 1999 Canton Township passed a sidewalk ordinance that includes criteria to assess and determine repairs to sidewalks. In the same year, Canton commenced a sidewalk repair program which continues to this day. Over the initial 15 years, from 1999-2013, the Township assessed and made repairs to sidewalks in all of the platted subdivisions within Canton Township. The program assesses sidewalks in residential area in discrete, targeted geographic zones of the Township. In addition, we assess any sidewalk complaints each year that lie outside the targeted zones. In 2015 the program was expanded to include the primary roads (non-residential areas). In addition to the sidewalk assessments, Canton Township assesses pedestrian crossings in the residential areas with concrete defects and repairs and re-constructs these crossings to the current ADA standards.
Section 2

SECTION 2: Site Assessment

- Spalding DeDecker Report ............................................. 74
- Site Assessments .......................................................... 75
- ADA Action Log ........................................................... 83
Spalding DeDecker first completed an Assessment of Township Facilities Regarding Pedestrian Access for Persons with Disabilities for Canton Township in 2009. Engineers determined if the exterior pedestrian routes and parking areas of public facilities owned and maintained by the Township met the Federal ADA Standards. Facilities were re-inspected and the assessment was updated in 2012.

In 2018, Spalding DeDecker returned to re-assess those same facilities and assess any new facilities that the Township is now responsible for.

Spalding DeDecker has staff specializing in ADA Standards for pedestrian routes of public facilities and within public rights-of-way. We have completed ADA assessments for numerous municipal, educational, and commercial clients. Spalding DeDecker has identified necessary improvements, designed construction plans to bring sites up to compliancy, and provided construction inspection and management to verify that improvements are being built according to the required ADA standards.

As part of this update for Canton Township, our on-site field analysis determined if the accessible parking was compliant to Federal ADA Standards and if there was an accessible route from parking to the facilities. The existing pedestrian routes were checked for meeting Federal ADA Standards specific to change in grade, cross slopes, longitudinal slopes, ramps, and location and types of ADA Detectable Warning Plates.

The field inspection data was used to identify specific improvements required to make each site fully ADA compliant. Estimated costs of the recommended improvements are provided by location for the Township's budgeting and prioritizing purposes.

The attached table summarizes our findings by location of the public facilities owned by Canton Township.

INTRODUCTION
Access to civic life by people with disabilities is a fundamental goal of the Americans with Disabilities Act (ADA). To ensure that this goal is met, Title II of the ADA requires State and local governments to make their Services, Programs and Activities (S/P/A) accessible to persons with disabilities. This requirement extends not only to physical access, but also to policy changes and effective communication. This Transition Plan will address only the physical access requirements.

BACKGROUND
All public entities, regardless of size, must comply with ADA Title II – “Nondiscrimination on the Basis of Disability in State and Local Government Services”. There is no “grandfather” clause in the ADA, which took effect January 26, 1992 and is enforced by the Department of Justice as civil rights legislation. In 2010 the DOJ adopted an updated version of the guidelines referred to as the “2010 ADA Standards”. Compliance with the new Standards was voluntary as of September 15, 2010, and became mandatory after March 15, 2012. The rules include a general "safe harbor" under which elements in covered facilities that were built or altered in compliance with the 1991 Standards would not be required to be brought into compliance with the 2010 Standards until the elements were subject to a planned alteration. Similar safe harbors were adopted for elements associated with the "path of travel" to an altered area.

GENERAL REQUIREMENTS
Governments are not required to take any action that would result in a “fundamental alteration” to the nature of a service, program or activity or that would result in “undue financial or administrative burdens”.

Remedial measures may include: 1) relocation of programs to accessible facilities; 2) offering programs in an alternative accessible manner; 3) structural (physical) changes to provide program access; 4) policy modifications to ensure nondiscrimination; and 5) auxiliary aids needed to provide effective communication.

Governments may choose to make physical changes to existing facilities, but are not required to do so. Common examples of alternatives include: 1) Moving a public meeting to an accessible facility, 2) Relocate a public billing window from the second floor to an accessible part of the first floor, 3) Providing student fire station tours at an accessible facility. When choosing among available options, a public entity must give priority to those methods that offer services, programs and activities “in the most integrated setting appropriate”.

In addition, all newly constructed municipal facilities (since 1992) must be fully accessible to people with disabilities, including the public and employees. Alterations to existing facilities must follow the guidelines for new construction, with some limited exceptions. Additions to existing facilities are treated like Alterations. Historically significant facilities, listed by the National
Register or by State/local law, are granted some exemptions to physical changes that would “threaten or destroy the historical significance” or would fundamentally change the program being offered at the facility.

SELF-EVALUATION
The self-evaluation is a review of all township services, programs, and activities to identify any physical barriers or policies, practices, or procedures that may limit or exclude participation by people with disabilities. The self-evaluation includes permanent, temporary, and periodic services, programs, and activities. The township looks at what services, programs, or activities are offered and in what location. The self-evaluation also identifies problems with the accessibility of facilities and establishes recommendations for providing program accessibility (which may include relocation to an accessible facility).

If a township with 50 or more employees decides to make physical changes to achieve program access it must develop a written Transition Plan that identifies the modifications that will be made. The plan should include timelines for completing these modifications. Interested parties, including people with disabilities and organizations representing people with disabilities, must at a minimum have an opportunity to participate in the development of the plan by submitting comments. A copy of the plan and a copy of the self-evaluation must be available for public inspection for three years after completion.

Assessments
The “physical barriers” portion of the self-evaluation was conducted by Spalding DeDecker Associates (civil and site) and A3C-Collaborative Architecture (buildings and facilities) resulting in the Assessment which is included in Exhibit A. The original Assessment was based on the ADAAG was published in 1991 and adopted by the Department of Justice (DOJ) for Title II enforcement. The playground assessments were based on the “ADAAG for Play Areas” published in 2000, but not then adopted by the DOJ. Assessments of fishing piers and swimming pools were similarly based on the “ADAAG for Recreational Facilities”, which also had not been adopted by DOJ. Subsequently, the 2010 ADA Standards officially adopted these documents, and others, and the original Assessment was “translated” to accommodate the new Standards.

The building/facility assessments address primarily “dimensional” requirements and do not include evaluation of such features as: alarm decibels, illumination intensity, pulse rate or duration; elevator speed, leveling, door timing, safety return force; availability of Braille documents; 9-1-1 TTY (text telephone) capabilities. The playground assessments included site observation and spot checking of dimensions, but do not include testing to confirm compliance with (ASTM) standards for playground surfacing.
TRANSITION PLAN

The major purpose of a Transition Plan, as it relates to buildings and facilities owned and operated by the Township, is to document the barriers to persons with disabilities that are present in the facilities and to propose the physical modifications that will be undertaken to provide program accessibility. One of the most important aspects of preparing a transition plan is assigning priorities to physical modifications necessary to achieve program access. Obviously, the highest priority items should be undertaken first, and the transition schedule is dependent on these determinations.

In general, there are two types of prioritizations that must take place: 1) Prioritization of individual facilities; and 2) Prioritization of barriers and their removal within each individual facility.

The prioritization of facilities and elements should not be interpreted to mean that some work is more important than other work without regard to the facility. The applicable codes and standards do not distinguish between "important" or "unimportant" requirements, and certainly all requirements should be met for a facility to be deemed fully accessible. Also, priority numbers are not static and are subject to re-evaluation as the review and approval process proceeds.

Priorities of Facilities

One of the major determinants for this prioritization involves an analysis of the Township’s services, programs and activities offered at each facility. Other factors that weigh in these determinations include: whether the facility is owned, rented, or leased; the number of public visits; presence of a federal polling place; and employee activity and participation. However, it is impossible to generalize, and each facility must be analyzed on a case-by-case basis.

In the Site Assessment Prioritization Chart, each facility is assigned an averaged value of prioritization. This represents a starting point for determining in which order the facilities may addressed. It is important to realize that any prioritization is not given to imply that some items are not important or that correction is not necessary. Rather, such a prioritization is intended to reflect the desires of the Township in establishing which improvements should be undertaken first or given priority in a phased implementation.

Priorities of Elements

Each non-compliant element was evaluated for priority of barrier removal. Barriers under each facility element are characterized as Priority 1, 2, or 3 and are identified in the Remarks column of each checklist in the Assessment. Priorities are used to establish consistent levels of accessibility to allow facility comparison. The numeric designation does not necessarily establish a level of importance relative to other work.

High priority (Priority 1 – Access to Facility) items generally include those that affect the primary accessibility of a facility; conditions that would generally make a facility unusable for a broad
spectrum of persons with disabilities. Priority 1 work sets a minimum level of accessibility for all facilities. Completion of priority 1 work will insure that a person with a disability can get into the facility.

Medium priority (Priority 2 – Access to Services, Programs, and Activities) items would generally include items that adversely affect the "quality" of usage of a facility for persons with disabilities, as afforded to non-disabled persons. Priority 2 work will achieve a degree of accessibility insuring that each SPA at those facilities, including restrooms, can be provided in at least one accessible location.

Low priority (Priority 3 – Access to Other Spaces and Elements) items would generally include items that might represent a small deviation from applicable codes and standards, or items where alternative means of usage are possibly available. Completion of priority 3 items will provide full facility access, including non-public spaces, assuring that all elements at all of these locations are fully accessible.

Each non-compliant element is further identified by the level of effort required to remove the barrier and are also found in the Priorities column of each checklist in the Assessment. These levels are identified as:

- A (Administrative), that may be resolved through administrative solutions.
- M (Maintenance), that may be readily corrected by available maintenance personnel.
- C (Contractor), that may require a licensed contractor to complete.
- DB (Design/Build), that may require design services of a licensed architect/engineer as well as Contractor services.

**Priorities Summary**
The priorities set herein are for this transition plan only. Modernization work not related to this transition plan may trigger a requirement to complete access work on a different schedule, or to complete work not scheduled in the transition plan. The same may be said of non-compliant elements that present an immediate physical hazard or have resulted in a filed complaint. It also bears repeating that any of the indicated physical barriers may be offset by administrative “fixes” such as relocating a S/P/A to an already accessible location.

Where the Township undertakes new construction or modernization not restricted to accessibility work, modifications to upgrade accessibility features may be required that are not proposed in this transition plan. Such work may also be triggered by the applicable state building codes and this work is separate from the program access requirement addressed by the self-evaluation and this transition plan. Due to the Township’s efforts to make as many accessibility improvements as possible on a continual basis, some physical improvements listed in the Assessments may have been begun, partially completed, or fully completed prior to the adoption of this Transition Plan.

[2] - Public Visits - Category is scored from 0 - 5 with 0 being no public visits to 5 being significant amount of public traffic

[3] - Polling Location - Category is scored 0 - 3 with 0 being no polling activity to 3 being significant polling activity

[4] - Employee Activity - Category is scored from 0 - 3 with 0 being no employee participation to 3 being significant employee participation
ARCHITECTURAL INTRODUCTION

Access to civic life by people with disabilities is a fundamental goal of the Americans with Disabilities Act (ADA). To ensure that this goal is met, Title II of the ADA requires State and local governments to make their Services, Programs and Activities (S/P/A) accessible to persons with disabilities. This requirement extends not only to physical access, but also to policy changes and effective communication. This assessment will address only the physical access requirements.

All public entities, regardless of size, must comply with ADA Title II – “Nondiscrimination on the Basis of Disability in State and Local Government Services”. There is no “grandfather” clause in the ADA, which took effect January 26, 1992. Governments are not required to take any action that would result in a “fundamental alteration” to the nature of a service, program or activity or that would result in “undue financial or administrative burdens”.

Remedial measures may include: 1) relocation of programs to accessible facilities; 2) offering programs in an alternative accessible manner; 3) structural (physical) changes to provide program access; 4) policy modifications to ensure nondiscrimination; and 5) auxiliary aids needed to provide effective communication.

Governments may choose to make physical changes to existing facilities, but are not required to do so. Common examples of alternatives include: 1) Moving a public meeting to an accessible facility, 2) Relocate a public billing window from the second floor to an accessible part of the first floor, 3) Providing student fire station tours at an accessible facility. When choosing among available options, a public entity must give priority to those methods that offer services, programs and activities “in the most integrated setting appropriate”.

In addition, all newly constructed municipal facilities (since 1992) must be fully accessible to people with disabilities, including the public and employees. Alterations to existing facilities must follow the guidelines for new construction, with some limited exceptions. Additions to existing facilities are treated like Alterations. Historically significant facilities, listed by the National Register or by State/local law, are granted some exemptions to physical changes that would “threaten or destroy the historical significance” or would fundamentally change the program being offered at the facility.

Initially the architectural design standards could be chosen by the municipality from either the UFAS (Uniform Federal Accessibility Standards) or the ADAAG (ADA Accessibility Guidelines). Canton Township, and hence this facility assessment, has chosen the latter. The original ADAAG was published in 1991 and adopted by the Department of Justice (DOJ) for Title II enforcement. In 2010 the DOJ adopted the 2010 ADA Standards, which were voluntary until March 2012 when they became mandatory. The findings of the original Assessment of November 2009 were updated to indicate compliance with the 2010 ADA Standards.
The building/facility assessments address primarily “dimensional” requirements and do not include evaluation of such features as: alarm decibels, illumination intensity, pulse rate or duration; elevator speed, leveling, door timing, safety return force; availability of Braille documents; 9-1-1 TTY (text telephone) capabilities. The playground assessments included site observation and spot checking of dimensions, but did not include testing to confirm compliance with (ASTM) standards for playground surfacing.

The following Facility Audit Checklist sections are overview templates that outline the relevance of special exemptions and are presented only the at beginning of the Assessment.

A. New Construction, Additions, and Alterations.
B. Historical Buildings & Historic Preservation.

The following Facility Audit Checklists were completed for each facility. They progress through the building from the entrances to the specific features and types of facilities. Within each Section the checklist proceeds from the Scoping Requirements (what, where) to the Technical Requirements (how many, width, slope). Each relevant item is noted as either compliant (C), non-compliant (NC), or not applicable (NA). [Note: this edition contains only those items deemed non-compliant.] Sections that were considered “not relevant” to a particular facility were not included.

C. Entrances.
D. Interior Accessible Route.
E. Rooms & Spaces.
F. Toilet Rooms & Bathing Rooms.
G. Special Features – Drinking Fountains, Storage, Controls, Alarms, Signage, Public Telephones, Built-In Seating & Tables, ATMs; and Special Types of Facilities – Dining Areas, Service Counters, Fishing Piers, Swimming Pools, Play Areas.

## B. HISTORIC BUILDINGS & HISTORIC PRESERVATION - OVERVIEW

<table>
<thead>
<tr>
<th>Section</th>
<th>Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>202.5</td>
<td>Alterations shall comply with 202.3 &amp; 202.4.</td>
</tr>
</tbody>
</table>
| 106.5   | Qualified Historic Buildings:  
  - National Register of Historic Places listing, or  
  - Designation by State or Local law. |
| 202.5 ex. | - If compliance with requirements for accessible routes (exterior and interior), entrances, or toilets would “threaten or destroy the historical significance” of the building, entity should consult with State Historic Preservation Officer.  
  - If approved by above, the alternative requirements may be used. |
| 206.2.1 ex.1 | Min. one accessible route from site access point to an accessible entrance. |
| 206.4 ex.2 | Min. one accessible public entrance per 4.14.  
  - Non-public entry left unlocked, or a locked entry and notification system, is allowed where public entry is not feasible. |
| 213.2 ex.2 | If toilets are provided, min. one toilet per sex or a unisex toilet. |
| 206.3 ex.7 | Accessible route from entrance to all public spaces on at least the same level as accessible entry.  
  - Historic Preservation Programs:  
    - If compliance with the alternatives is infeasible, alternative methods of program access must be provided (e.g. video tapes of second floor tours). |
|         | Refer to 28 CFR _35.150(a) & (b)(2) |

### Canton Township ADA Assessment

**Facility Priority Checklist:** COMPiled  
**Updated:** 5/30/2018

**Building 01A Administration Office - Administration Building**

**2A** - "Private" Toilet Rooms must be "adaptable" to accommodate future users; adding grab bars, fixture heights and clearances, etc.  
These include Toilet Rooms 110, 159, 186, 189, 221, 305, 321, 319; vanities make adaptability costly.

**2A 213.2** - Alterations which are "technically infeasible" may be accommodated by one Unisex facility located in the same area as the existing toilet.  
Toilet Rooms 045, 124, 184, 356 may be deemed "technically infeasible" to alter; not reviewed.

Notes:

1. Property/Building Rental or Leased - Category is scored 0 - 5 with 0 being no rental activity to 5 being significant amount of rental or lease activity
2. Public Visits - Category is scored from 0 - 5 with 0 being no public visits to 5 being significant amount of public traffic
3. Polling Location - Category is scored 0 - 3 with 0 being no polling activity to 3 being polling activity
4. Employee Activity - Category is scored from 0 - 3 with 0 being no employee participation to 3 being significant employee participation

Changes from 2011 to 2019:

BLOCK Teen Center is now located as part of the Administration Building (formerly located on Sheldon Rd./Michigan Ave.)

Right-of-Ways were removed from the list due to being remedied and are part of the Wayne County roads

Arctic Edge: per contract agreement, lessor is responsible for all maintenance and capital improvements to the property

SECTION 4: Playground Assessment

• A3C Collaborative Architecture Report ......................... 241

• Playground Assessments .............................................. 242

• ADA Action Log ....................................................... 243
Playground Guidelines Applicability

The Americans with Disabilities Act (ADA) is a civil rights law, which prohibits discrimination on the basis of disability. In 2000, the Architectural and Transportation Barriers Compliance Board issued a final rule in the form of accessibility guidelines to serve as the basis for standards adopted by the Department of Justice for new construction and alterations of play areas by the ADA.

The ADA specifically requires that “each service, program or activity conducted by a public entity, when viewed in its entirety, be readily accessible to, and usable by, individuals with disabilities.” The law covers “both indoor and outdoor areas where human-constructed improvements, structures, equipment or property have been added to the natural environment.”

Title III also specifically states that for public accommodations discrimination includes “failure to remove architectural barriers . . . in existing facilities” unless it can be shown that removing a barrier is “not readily achievable” or accommodations cannot be provided through other means. (See 42 U.S.C. Section 12182(b)(2)(iv)&(v)).

The most recent version of the ADA Title III regulations is the 2010 Standards for Accessible Design. This standard applies to new and existing play areas – meaning that you must bring all playgrounds into ADA compliance. A municipal playground is considered a service.

Playgrounds are not covered under the Safe Harbor provision of Title III. An implementation plan may serve as a piece of evidence showing a “good faith effort to comply.” A plan is based on the following priorities:

- Priority 1: Accessible Approach/Entrance including parking and drop off areas
- Priority 2: Access to goods and services
- Priority 3: Usability of Restrooms
- Priority 4: Additional access such as drinking fountains
- Size of the playground, unique feature, geographic area served should also be considered in your prioritization.

An ADA compliant playground will:

- Be accessible via ramps and/or paved, barrier-free travel routes;
- Include a range of accessible play options;
- Provide an appropriate surface beneath all accessible equipment.

The guidelines require looking at play areas as a collection of individual play components to determine the minimum amount required to be accessible. Minimum requirements are based on the number and type of ground level components and elected play components provided. Elevated play components are part of a composite playstructure where the entrance and/or exit of the activity is above ground level. Access to at least 50 percent of the elevated play components is required. Access by way of a transfer system is acceptable when less than 20 elevated play components are provided. If 20 or more are provided, then a ramp is required to at least 25 percent. Ground level play components are those that are approached and exited at the ground level. Access to ground level components is required to at least one of each type provided and in a number proportionate to the number of elevated play components provided. An accessible surface to each accessible component is required.

NOTES:
This review was based on the proposed ADA Accessibility Guidelines for Play Areas available in November 2009. These have since been adopted by the DOJ and incorporated into the 2010 Standards. For accessible route compliance to the playgrounds refer to the appropriate SDA section of this report. Assessment did not include testing of surfacing for impact or accessibility requirements. Added components must also meet the Play Type requirement.
